Enabling Real-time Analytics on IBM z Systems Platform Lydia Parziale, Oliver Benke, Willie Favero, Ravi Kumar, Steven LaFalce, Cedrine Madera, Sebastian Muszytowski, IBM Redbooks, 2016-08-08 Regarding online transaction processing OLTP workloads IBM z Systems™ platform with IBM DB2 data sharing Workload Manager WLM geoplex and other high end features is the widely acknowledged leader Most customers now integrate business analytics with OLTP by running for example scoring functions from transactional context for real time analytics or by applying machine learning algorithms on enterprise data that is kept on the mainframe As a result IBM adds investment so clients can keep the complete lifecycle for data analysis modeling and scoring on z Systems control in a cost efficient way keeping the qualities of services in availability security reliability that z Systems solutions offer Because of the changed architecture and tighter integration IBM has shown in a customer proof of concept that a particular client was able to achieve an orders of magnitude improvement in performance allowing that client s data scientist to investigate the data in a more interactive process Open technologies such as Predictive Model Markup Language PMML can help customers update single components instead of being forced to replace everything at once As a result you have the possibility to combine your preferred tool for model generation such as SAS Enterprise Miner or IBM SPSS Modeler with a different technology for model scoring such as Zementis a company focused on PMML scoring IBM SPSS Modeler is a leading data mining workbench that can apply various algorithms in data preparation cleansing statistics visualization machine learning and predictive analytics It has over 20 years of experience and continued development and is integrated with z Systems With IBM DB2 Analytics Accelerator 5.1 and SPSS Modeler 17.1 the possibility exists to do the complete predictive model creation including data transformation within DB2 Analytics Accelerator So instead of moving the data to a distributed environment algorithms can be pushed to the data using cost efficient DB2 Accelerator for the required resource intensive operations This IBM Redbooks publication explains the overall z Systems architecture how the components can be installed and customized how the new IBM DB2 Analytics Accelerator loader can help efficient data loading for z Systems data and external data how in database transformation in database modeling and in transactional real time scoring can be used and what other related technologies are available This book is intended for technical specialists and architects and data scientists who want to use the technology on the z Systems platform Most of the technologies described in this book require IBM DB2 for z OS For acceleration of the data investigation data transformation and data modeling process DB2 Analytics Accelerator is required Most value can be achieved if most of the data already resides on z Systems platforms although adding external data like from social sources poses no problem at all *InfoSphere DataStage Parallel Framework Standard Practices* Julius Lerm, Paul Christensen, IBM Redbooks, 2013-02-12 In this IBM Redbooks publication we present guidelines for the development of highly efficient and scalable information integration applications with InfoSphere™ DataStage DS parallel jobs InfoSphere DataStage is at the

core of IBM Information Server providing components that yield a high degree of freedom For any particular problem there might be multiple solutions which tend to be influenced by personal preferences background and previous experience All too often those solutions yield less than optimal and non scalable implementations This book includes a comprehensive detailed description of the components available and descriptions on how to use them to obtain scalable and efficient solutions for both batch and real time scenarios The advice provided in this document is the result of the combined proven experience from a number of expert practitioners in the field of high performance information integration evolved over several years This book is intended for IT architects Information Management specialists and Information Integration specialists responsible for delivering cost effective IBM InfoSphere DataStage performance on all platforms *Installation and Configuration Guide for MicroStrategy Analytics Enterprise* MicroStrategy Product Manuals, MicroStrategy, 2013-10-31 The Installation and Configuration Guide includes information to install and configure MicroStrategy products on Windows UNIX and Linux platforms as well as basic maintenance guidelines *Big Data Processing Using Spark in Cloud* Mamta Mittal, Valentina E. Balas, Lalit Mohan Goyal, Raghvendra Kumar, 2018-06-16 The book describes the emergence of big data technologies and the role of Spark in the entire big data stack It compares Spark and Hadoop and identifies the shortcomings of Hadoop that have been overcome by Spark The book mainly focuses on the in depth architecture of Spark and our understanding of Spark RDDs and how RDD complements big data's immutable nature and solves it with lazy evaluation cacheable and type inference It also addresses advanced topics in Spark starting with the basics of Scala and the core Spark framework and exploring Spark data frames machine learning using Mllib graph analytics using Graph X and real time processing with Apache Kafka AWS Kinesis and Azure Event Hub It then goes on to investigate Spark using PySpark and R Focusing on the current big data stack the book examines the interaction with current big data tools with Spark being the core processing layer for all types of data The book is intended for data engineers and scientists working on massive datasets and big data technologies in the cloud In addition to industry professionals it is helpful for aspiring data processing professionals and students working in big data processing and cloud computing environments *Enabling the New Era of Cloud Computing: Data Security, Transfer, and Management* Shen, Yushi, 2013-11-30 Cloud computing is becoming the next revolution in the IT industry providing central storage for internet data and services that have the potential to bring data transmission performance security and privacy data deluge and inefficient architecture to the next level Enabling the New Era of Cloud Computing Data Security Transfer and Management discusses cloud computing as an emerging technology and its critical role in the IT industry upgrade and economic development in the future This book is an essential resource for business decision makers technology investors architects and engineers and cloud consumers interested in the cloud computing future *New Ways of Running Batch Applications on z/OS: Volume 4 IBM IMS* Denis Gaebler, Alex Louwe Kooijmans, Elsie Ramos, IBM Redbooks, 2014-05-28 Mainframe computers play a central role in the daily operations of many of

the world's largest corporations Batch processing is still a fundamental mission critical component of the workloads that run on the mainframe A large portion of the workload on IBM z OS systems is processed in batch mode This IBM Redbooks publication is the fourth volume in a series of four They address new technologies introduced by IBM to facilitate the use of hybrid batch applications that combine the best aspects of Java and procedural programming languages such as COBOL This volume focuses on the latest enhancements in IBM IMSTM batch support IMS has been available to clients for 45 years as IMS Transaction Manager IMS Database Manager or both The audience for this book includes IT architects and application developers with a focus on batch processing on the z OS platform **PC Magazine** ,2002 Computerworld ,2008
