Beyond the Cyborg Margret Grebowicz, Helen Merrick, 2013-07-09 This long overdue volume explores Donna Haraway's influence on feminist theory and philosophy paying particular attention to her more recent work on companion species rather than her *Manifesto for Cyborgs*

Representing Reason Rachel Joffe Falmagne, Marjorie Hass, 2002-10-16 Philosophy's traditional man of reason independent neutral unemotional is an illusion That's because the man of reason ignores one very important thing the woman As feminist philosophy grew in the 1980s and 90s it became clear that the attributes philosophical tradition wrote off as womanly are in fact part of human nature No longer can philosophy maintain the dichotomy between the rational man and the emotional woman but must now examine a more complex human being able to reason and feel Yet feminist philosophy also makes it clear that men and women theorize the world in different ways from different perspectives *Representing Reasons Feminist Theory and Formal Logic* collects new and old essays that shed light on the underexplored intersection of logic and feminism The papers in this collection cross over many of the traditional divides between continental and analytic philosophy between philosophical reflection and empirical investigation and between empirical investigations with an individual or societal grain of analysis This is possible because *Representing Reasons* frames the relationship between logic and feminism in terms of issues rather than historical figures or methodologies As such the articles serve as a model for crossing these divides just as they break down the traditional divide between logic and feminism

The SAGE Handbook of Feminist Theory Mary Evans, Clare Hemmings, Marsha Henry, Hazel Johnstone, Sumi Madhok, Ania Plomien, Sadie Wearing, 2014-08-12 At no point in recorded history has there been an absence

of intense and heated discussion about the subject of how to conduct relations between women and men This Handbook provides a comprehensive guide to these omnipresent issues and debates mapping the present and future of thinking about feminist theory The chapters gathered here present the state of the art in scholarship in the field covering Epistemology and marginality Literary visual and cultural representations Sexuality Macro and microeconomics of gender Conflict and peace The most important consensus in this volume is that a central organizing tenet of feminism is its willingness to examine the ways in which gender and relations between women and men have been and are organized The authors bring a shared commitment to the critical appraisal of gender relations as well as a recognition that to think theoretically is not to detach concerns from lived experience but to extend the possibilities of understanding With this focus on theory and theorizing about the world in which we live this Handbook asks us across all disciplines and situations to abandon our taken for granted assumptions about the world and interrogate both the origin and the implications of our ideas about gender relations and feminism It is an essential reference work for advanced students and academics not only of feminist theory but of gender and sexuality across the humanities and social sciences *Idealism, Relativism, and Realism* Dominik Finkelde, Paul M.

Livingston, 2020-05-05 Several debates of the last years within the research field of contemporary realism known under titles such as New Realism Continental Realism or Speculative Materialism have shown that science is not systematically the ultimate measure of truth and reality This does not mean that we should abandon the notions of truth or objectivity all together as has been posited repeatedly within certain currents of twentieth century philosophy However within the research field of contemporary realism the concept of objectivity itself has not been adequately refined What is objective is supposed to be true outside a subject's biases interpretations and opinions having truth conditions that are met by the way the world is The volume combines articles of internationally outstanding authors who have published on either Idealism Epistemic

Relativism or Realism and often locate themselves within one of these divergent schools of thought As such the volume focuses on these traditions with the aim of clarifying what the concept objectivity nowadays stands for within contemporary ontology and epistemology beyond the analytic continental divide With articles from Jocelyn Benoist Ray Brassier G Anthony Bruno Dominik Finkelde Markus Gabriel Deborah Goldgaber Iain Hamilton Grant Graham Harman Johannes H bner Andrea Kern Anton F Koch Martin Kusch Paul M Livingston Paul Redding Sebastian R dl Dieter Sturma **Theories and**

Methodologies in Postgraduate Feminist Research Rosemarie Buikema, Gabriele Griffin, Nina Lykke, 2012-03-29 This volume centers on theories and methodologies for postgraduate feminist researchers engaged in interdisciplinary research in a context of increasing globalization giving special attention to cutting edge approaches at the borders between humanities and social sciences and specific discipline transgressing fields such as feminist technoscience studies **Debates in**

Transgender, Queer, and Feminist Theory Patricia Elliot, 2016-05-13 Transgender studies is a heterogeneous site of debate that is marked by tensions border wars and rifts both within the field and among feminist and queer theorists

Intersecting the domains of women's studies, sexuality, gender and transgender studies, *Debates in Transgender, Queer and Feminist Theory* provides a critical analysis of key texts and theories engaging in a dialogue with prominent theorists of transgendered identity, embodiment and sexual politics and intervening in various aspects of a conceptually and politically difficult terrain. A central concern is the question of whether the theories and practices needed to foster and secure the lives of transsexuals and transgendered persons will be promoted or undermined, a concern that raises broader social, political and ethical questions surrounding assumptions about gender, sexuality and sexual difference, perceptions of transgendered embodiments and identities and conceptions of divergent desires, goals and visions. **Encountering Affect** Ben

Anderson, 2017-03-02 Since the mid 1990s, affect has become central to the social sciences and humanities. Debates abound over how to conceptualise affect and how to understand the interrelationships between affective life and a range of contemporary political transformations. In *Encountering Affect*, Ben Anderson explores why understanding affect matters and offers one account of affective life that hones in on the different ways in which affects are ordered. Intervening in debates around non-representational theories, he argues that affective life is always already mediated, the never-finished product of apparatuses, encounters and conditions. Through a wide range of examples, including dread, debility, dependency, in torture, ordinary hopes and precariousness, Anderson shows the significance of affect for understanding life today. **Material**

Feminisms Stacy Alaimo, Susan J. Hekman, 2008-01-02 Harnessing the energy of provocative theories generated by recent understandings of the human body, the natural world and the material world, *Material Feminisms* presents a way for feminists to conceive of the question of materiality. **Women's Studies on the Edge** Joan Wallach Scott, 2008-06-09 Essays on the future of women's studies as an academic discipline. **Feminist Epistemology and Philosophy of Science** Heidi E.

Grasswick, 2011-05-16 Having enjoyed more than twenty years of development, feminist epistemology and philosophy of science are now thriving fields of inquiry offering current scholars a rich tradition from which to draw. In addition to a recognition of the power of knowledge itself and its effects on women's lives, a central feature of feminist epistemology and philosophy of science has been the attention they draw to the role of power dynamics within knowledge-seeking practices and the implications of these dynamics for our understandings of knowledge, science and epistemology. *Feminist Epistemology and Philosophy of Science: Power in Knowledge* collects new works that address today's key challenges for a power-sensitive feminist approach to questions of knowledge and scientific practice. The essays build upon established work in feminist epistemology and philosophy of science, offering new developments in the fields and representing the broad array of the feminist work now being done and the many ways in which feminists incorporate power dynamics into their analyses.

Routledge Handbook of Gender and Environment Sherilyn MacGregor, 2017-07-14 The *Routledge Handbook of Gender and Environment* gathers together state-of-the-art theoretical reflections and empirical research from leading researchers and practitioners working in this transdisciplinary and transnational academic field. these contributors provide critical analyses of the gender dimensions of a wide range of timely and challenging topics from sustainable development and climate change politics to queer ecology and interspecies ethics in the so called Anthropocene Presenting a comprehensive overview of the development of the field from early political critiques of the male domination of women and nature in the 1980s to the sophisticated intersectional and inclusive analyses of the present the volume is divided into four parts Part I Foundations Part II Approaches Part III Politics policy and practice Part IV Futures Comprising chapters written by forty contributors with different perspectives and working in a wide range of research contexts around the world this Handbook will serve as a vital resource for scholars students and practitioners in environmental studies gender studies human geography and the environmental humanities and social sciences more broadly *Gut Feminism* Elizabeth A. Wilson, 2015-09-17 In *Gut Feminism* Elizabeth A. Wilson urges feminists to rethink their resistance to biological and pharmaceutical data Turning her attention to the gut and depression she asks what conceptual and methodological innovations become possible when feminist theory isn't so instinctively antibiological She examines research on antidepressants placebos transference phantasy eating disorders and suicidality with two goals in mind to show how pharmaceutical data can be useful for feminist theory and to address the necessary role of aggression in feminist politics *Gut Feminism*'s provocative challenge to feminist theory is that it would be more powerful if it could attend to biological data and tolerate its own capacity for harm
