Uzunov,2010 This book provides

a comprehensive introduction to the theory of phase transitions and critical phenomena The content covers a period of more than 100 years of theoretical research of condensed matter phases and phase transitions providing a clear interrelationship with experimental problems It starts from certain basic University knowledge of thermodynamics statistical physics and quantum mechanics The text is illustrated with classic examples of phase transitions Various types of phase transition and multi critical points are introduced and explained The classic aspects of the theory are naturally related with the modern developments This interrelationship and the field theoretical renormalization group method are presented in details The main applications of the renormalization group methods are presented Special attention is paid to the description of quantum phase transitions This edition contains a more detailed presentation of the renormalization group method and its applications to particular systems

Judicial Review, Fundamental Rights and Rule of Law Maria Grazia Rodomonte, Ludovica Durst, 2025-02-21 This book explores the complex issue of building a common European identity and the factors that contribute to it with special regard to the role played by the interaction between national Constitutional Courts and European Courts There is no doubt that the Courts have been key actors in the progressive establishment of this identity over the years by defining elements of homogeneity and affirming or reaffirming essential values such as human dignity in respect of that pluralism which represents a distinctive feature of Europe Nevertheless this circular movement has not failed to reveal contradictions and concerns that are still unresolved over time With contributions from authors from a range of backgrounds this work delves into the theme with a variety of approaches and perspectives It is structured in three main parts the first exploring the historical roots of a common European heritage emphasizing its role in shaping what is currently called the European way of life The second part examines the lights and shadows of constructing the European identity through the instruments of multilevel and inter court relationships by critically analysing the propulsive and homogenising tendencies coming in particular from the Court of Justice of the European Union The third part considers the so called dialogue between Courts by addressing some significant jurisprudential trends of supranational and national Courts and relevant cases in recent years offering new insights into the model of multilevel protection of rights Presenting a wide and comprehensive view of these topics the book will be of interest to those working in the fields of Constitutional European and Comparative Public Law as well as Legal History and Sociology

Hands-On Artificial Intelligence on Amazon Web Services Subhashini Tripuraneni, Charles Song, 2019-10-04 Perform cloud based machine learning and deep learning using Amazon Web Services such as SageMaker Lex Comprehend Translate and Polly Key Features Explore popular machine learning and deep learning services with their underlying algorithms Discover readily available artificial intelligence AI APIs on AWS like Vision and Language Services Design robust architectures to enable experimentation extensibility and maintainability of AI apps Book Description From data wrangling through to translating text you can accomplish this and more with the artificial intelligence and machine learning services available on AWS With this book you ll work through hands on exercises and learn to use

these services to solve real world problems You ll even design develop monitor and maintain machine and deep learning models on AWS The book starts with an introduction to AI and its applications in different industries along with an overview of AWS artificial intelligence and machine learning services You ll then get to grips with detecting and translating text with Amazon Rekognition and Amazon Translate The book will assist you in performing speech to text with Amazon Transcribe and Amazon Polly Later you ll discover the use of Amazon Comprehend for extracting information from text and Amazon Lex for building voice chatbots You will also understand the key capabilities of Amazon SageMaker such as wrangling big data discovering topics in text collections and classifying images Finally you ll cover sales forecasting with deep learning and autoregression before exploring the importance of a feedback loop in machine learning By the end of this book you will have the skills you need to implement AI in AWS through hands on exercises that cover all aspects of the ML model life cycle What you will learn Gain useful insights into different machine and deep learning models Build and deploy robust deep learning systems to production Train machine and deep learning models with diverse infrastructure specifications Scale AI apps without dealing with the complexity of managing the underlying infrastructure Monitor and Manage AI experiments efficiently Create AI apps using AWS pre trained AI services Who this book is for This book is for data scientists machine learning developers deep learning researchers and artificial intelligence enthusiasts who want to harness the power of AWS to implement powerful artificial intelligence solutions A basic understanding of machine learning concepts is expected

AI-Powered IoT for COVID-19 Fadi Al-Turjman, 2020-12-10 The Internet of Things IoT has made revolutionary advances in the utility grid as we know it Among these advances intelligent medical services are gaining much interest The use of Artificial Intelligence AI is increasing day after day in fighting one of the most significant viruses COVID 19 The purpose of this book is to present the detailed recent exploration of AI and IoT in the COVID 19 pandemic and similar applications The integrated AI and IoT paradigm is widely used in most medical applications as well as in sectors that deal with transacting data every day This book can be used by computer science undergraduate and postgraduate students researchers and practitioners and city administrators policy makers and government regulators It presents a smart and up to date model for COVID 19 and similar applications Novel architectural and medical use cases in the smart city project are the core aspects of this book The wide variety of topics it presents offers readers multiple perspectives on a variety of disciplines Prof Dr Fadi Al Turjman received his PhD in computer science from Queen s University Kingston Ontario Canada in 2011 He is a full professor and research center director at Near East University Nicosia Cyprus

An Introduction to the Theory of Point Processes D.J. Daley, David Vere-Jones, 2007-12-29 Point processes and random measures find wide applicability in telecommunications earthquakes image analysis spatial point patterns and stereology to name but a few areas The authors have made a major reshaping of their work in their first edition of 1988 and now present An Introduction to the Theory of Point Processes in two volumes with subtitles Volume I Elementary Theory and Methods and Volume II General Theory and

Structure Volume I contains the introductory chapters from the first edition together with an account of basic models second order theory and an informal account of prediction with the aim of making the material accessible to readers primarily interested in models and applications It also has three appendices that review the mathematical background needed mainly in Volume II Volume II sets out the basic theory of random measures and point processes in a unified setting and continues with the more theoretical topics of the first edition limit theorems ergodic theory Palm theory and evolutionary behaviour via martingales and conditional intensity The very substantial new material in this second volume includes expanded discussions of marked point processes convergence to equilibrium and the structure of spatial point processes
