Seeing and Believing Ellen T. Armour, 2023-07-04 Social media platforms are often denounced as bubbles or echo chambers In this view what we see tends to reinforce what we already believe and what we already believe shapes what we see Yet social movements such as Black Lives Matter rely heavily on the widespread dissemination of digital photographs and videos through social media In at least some cases visual images can challenge normative and normalized ways of grasping the world and prompt their viewers to see differently and even bring people together Seeing and Believing marshals religious resources to recast the significance of digital images in the struggle for social justice Ellen T Armour examines what distinguishes digital photography from its analogue predecessor and places the circulation of digital images in the broader context of virtual visual cultures She explores the challenges and opportunities that visually saturated social media landscapes present for users and organizers Despite the power of digital platforms and algorithms possibilities for disruption and resistance emerge from how people engage with these systems Armour offers ways of seeing drawn from Christianity and found in other religious traditions to help us break with entrenched habits and rethink how we engage with the images that grab our attention Developing theological perspectives on the power and peril of photography and technology Seeing and Believing provides suggestions for navigating the new media landscape that can spark what Armour calls photographic insurrection

Adsensory Financialisation Pamela Odih,2016-09-23 Adsensory technology presupposes a neoliberal entrepreneurial self as an integral feature of its biopolitical financialisation of healthcare regimes According to Michel Foucault neoliberalism is indebted to the endeavour of its self disciplined subjects investing human capital in a self regulated entrepreneurial pursuit of responsible healthcare and well being Primarily informed by social network analytics and virtual ethnographic observations this book identifies the biopolitical basis of adsensory technologies It argues that a paradoxical feature of adsensory technologies dissimulating that there is nothing Jean Baudrillard is the proliferation of risk This is because the dissimulation of nothing opens up the possibility that everything can be a risk in so far as the type of event it falls under can be treated according to the principles of insurance technology Francois Ewald Adsensory wearable technologies are called upon as a strategy of deterrence Jean Baudrillard to indemnify capitalism s production of signs which dissimulate their simulation In a context in which much that was certain now feigns its own existence the insurance professed by adsensory

technologies provides for an unrealisable guarantee against indefinable unknowable risks Based also on case studies of European Court of Justice personal finance insurance rulings this book engages critically with the neoliberal construct of the entrepreneurial lifestyle insurance subject Social network analytics are utilised here to map bio technology onto neoliberal regimes of financialised well being and healthcare provision In so doing the book situates adsensory technologies within the marketising healthcare management programmes that are currently aligning the neoliberal reengineering of health and well being citizenship with the biopolitical healthcare financialisation of populations Paradoxically in their endeavour to actor network virtual well being health communities adsensory technologies proliferate the individuating marketised conditions of neoliberal self regulating entrepreneurialism This gives rise to aleatory materialist dialectics of financialised surveillance far exceeding the regulatory time and space modalities of Foucauldian panoptics and Mathiesen synoptics Adsensory technologies are integral to a seismic transformation in the cultural economies of time presently eliding digital advertising and insurantal technologies Axiomatic with the synchronic times of the adsensory technologies valorised by lifestyle insurance much riskier asynchronic embodied times transgressively dissimilating the limits of financialisation are beginning to emerge

Seen and Unseen: Visual Cultures of Imperialism ,2017-10-02 Seen and Unseen teases out and explores how visual mediums construct visual cultures that often create limited perspectives of certain issues and groups This volume focuses in particular on the representation of Islam and Muslims It deals with fixed and stereotypical visual representations and explores alternative and challenging visual representations that reconstruct and dismantle existing belief systems It approaches the topic from a vantage point of diverse multiple perspectives Covering issues from Brunei Iran Egypt and England and cyberspace the essays in this volume examine the visual cultures of how Islam and Muslims are understood misunderstood misrepresented or even embraced visually Scholars in this volume draw on historical paintings books and their covers photography and news to demonstrate the diversity and sometimes contradictory visual cultures that construct and adhere meaning to how Islam and Muslim people are seen Contributors Hoda Afshar Jared Ahmed Syed Farid Alatas Sanaz Fotouhi Christiane Gruber Layla Hendow Raihana M M Bruno Starrs and Esmaeil Zeiny Thank Dog Jyothy Sreedhar,Dr. Mathew K. M.
