Standard Math Interactive Daniel Zwillinger, 1997-09-29 Edition after edition and for nearly a century CRC's Standard Mathematical Tables and Formulae has served as a standard reference. Now the old standard takes on a new electronic form CD ROM and a new name Standard Math Interactive™ Powered by the Maple™ symbolic math engine Standard Math Interactive™ is an interactive powerhouse for students and professionals *Teaching Mathematics through Problem-Solving in K-12 Classrooms* Matthew Oldridge, 2018-10-31 Teaching through problem solving is a commonly used phrase for mathematics educators. This book shows how to use worthwhile and interesting mathematics tasks and problems to build a classroom culture based on students reasoning and thinking. It develops a set of axioms about problem solving classrooms to show teachers that mathematics is playful and engaging. It presents an aspirational vision for school mathematics one which all teachers can bring into being in their classrooms **Mathematical Mindsets** Jo Boaler, 2015-11-02 Banish math anxiety and give students of all ages a clear roadmap to success. Mathematical Mindsets provides practical strategies and activities to help teachers and parents show all children even those who are convinced that they are bad at math that they can enjoy and succeed in math. Jo Boaler, Stanford researcher, professor of math education and expert on math learning has studied why students don't like math and often fail in math classes. She's followed thousands of students through middle and high schools to study how they learn and to find the most effective ways to unleash the math potential in all students. There is a clear gap between what research has shown to work in teaching math and what happens in schools and at home. This book bridges that gap by turning research findings into practical activities and advice. Boaler translates Carol Dweck's concept of mindset into math teaching and parenting strategies showing how students can go from self-doubt to strong self-confidence which is so important to math learning. Boaler reveals the steps that must be taken by schools and parents to improve math education for all. Mathematical Mindsets Explains how the brain processes mathematics learning. Reveals how to turn mistakes and struggles into valuable learning experiences. Provides examples of rich mathematical activities to replace rote learning. Explains ways to give students a positive math mindset. Gives examples of how assessment and grading policies need to change to support real understanding. Scores of students hate and fear math so they end up leaving school without an understanding of basic mathematical concepts. Their evasion and departure hinders math-related pathways and STEM career opportunities. Research has shown very clear methods to change this phenomena but the information has been confined to research journals until now. Mathematical Mindsets provides a proven practical roadmap to mathematics success for any student at any age **The Maple Book** Frank Garvan, 2001-11-28 Maple is a very powerful computer algebra system used by students, educators, mathematicians, statisticians, scientists and engineers for doing numerical and symbolic computations.
