Motivational Design for Learning and Performance John M. Keller, 2009-11-24 It is impossible to control another person's motivation. But much of the instructor's job involves stimulating learner motivation and learning environments should ideally be designed toward this goal. *Motivational Design for Learning and Performance* introduces readers to the core concepts of motivation and motivational design and applies this knowledge to the design process in a systematic step-by-step format. The ARCS model, theoretically robust, rooted in best practices and adaptable to a variety of practical uses, forms the basis of this problem-solving approach. Separate chapters cover each component of the model: attention, relevance, confidence, and satisfaction, and offer strategies for promoting each one in learners. From there, the motivational design process is explained in detail, supplemented by real-world examples and ready-to-use worksheets. The methods are applied to traditional and alternative settings, including gifted classes, elementary grades, self-directed learning, and corporate training. And the book is geared toward the non-specialist reader, making it accessible to those without a psychology or teaching background. With this guide, the reader learns how to: Identify motivation problems and goals; Decide whether the environment or the learners need changing; Generate attention, relevance, confidence, and satisfaction in learners; Integrate motivational design and instructional design; Select, develop, and evaluate motivational materials. Plus, a wealth of tables, worksheets, measures, and other valuable tools aid in the design process. Comprehensive and enlightening, *Motivational Design for Learning and Performance* furnishes an eminently practical body of knowledge to researchers and professionals in performance technology and instructional design, as well as educational psychologists, teachers, and trainers.

Motivation, Volition, and Engagement in Online Distance Learning Ucar, Hasan, Kumtepe, Alper Tolga, 2021-06-25 Motivation is an important factor in and for all education levels. However, as learners in online distance education milieus are away from both teachers, other learners, and the learning environments physically, this concept becomes more important for online education. Motivating learners in distance education and keeping their motivation alive throughout the learning process is an issue that should be emphasized and taken care of for teachers and instructional designers. At this point, although there are many approaches, models, and theories regarding enhancing and sustaining motivation and engagement in the education processes, it is seen that there is not enough work on or effective and efficient strategies that can be applied in online distance learning environments. *Motivation, Volition, and Engagement in Online Distance Learning* evaluates motivational obstacles in online distance education both theoretically and practically, identifies the strengths and weaknesses of the online education environments regarding motivation, and provides actionable motivational and volitional strategies for online educators. This book offers coverage of topics such as learning theories, motivation research, and synchronous online learning environments, making it a valuable resource for researchers, professionals, decision makers, institutions in all education levels, academicians, pre-service teachers, and most importantly, online educators from various disciplines and learners from all educational landscapes.
