College Rankings Compare:

Practices of Comparing Angelika Eppler, Walter Erhart, Johannes Grave, 2020-06-22 Practices of comparing shape how we perceive organize and change the world. Supposedly innocent practices of comparing play a decisive role in forming categories boundaries and hierarchies but they can also give an impetus to question and change such structures. Like almost no other human practice comparing pervades all social political economic and cultural spheres. This volume outlines the program of a new research agenda that places comparative practices at the center of an interdisciplinary exploration. Its contributions combine case studies with overarching systematic considerations. They show what insights can be gained and which further questions arise when one makes a seemingly trivial practice comparing the subject of in depth research.

University Rankings, Diversity, and the New Landscape of Higher Education, 2019-02-18 University rankings are a relatively new phenomenon in higher education. Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear. Rankings attempting to measure university performance beyond national borders. No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world. This book is written as part of the effort to better understand rankings and their effects on higher education. A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed. If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology. A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education. Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built. Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector. **The Force of**

Comparison Willibald Steinmetz, 2019-09-01 In an era defined by daily polls institutional rankings and other forms of social quantification it can be easy to forget that comparison has a long historical lineage. Presenting a range of multidisciplinary perspectives this volume investigates the concepts and practices of comparison from the early modern period to the present. Each chapter demonstrates how comparison has helped to drive the seemingly irresistible dynamism of the modern world exploring how comparatively minded assessors determine their units of analysis the criteria they select or ignore and just who it is that makes use of these comparisons and to what ends. A Good Match Rebecca Watson-Boone, 2007 Library personnel managers SLIS recruiters college and university guidance counselors along with those considering LIS as a career gain behind the scenes perspectives on the lives of real liberal arts educated librarians who have chosen this service oriented profession. In this seminal research Watson Boone independent researcher and former academic librarian investigates the

relationship in the College Alumni Librarians Study CALS surveys 431 librarians who graduated from eight liberal arts colleges Carleton Denison Earlham Grinnell Kalamazoo Lawrence Macalester and Swarthmore from 1962 2000 Following up related studies and connecting to broader library career issues this study complements prior quantitative studies with a qualitative approach covering 39 years Library personnel managers SLIS recruiters college and university guidance counselors and

The SAGE Encyclopedia of Higher Education Miriam E. David, Marilyn J. Amey, 2020-05-21 The SAGE Encyclopedia of Higher Education demonstrates the impact higher education has had on global economies and universities across the world

State Rankings 2016 Kathleen O'Leary Morgan, Scott Morgan, 2016-04-05 Published annually State Rankings features comprehensive state statistics making it easy to compare states across key measures in education health crime transportation taxes government finance and so much more The editors compile useful statistics that would otherwise take an enormous amount of time to research making it a favorite resource on reference shelves throughout the United States and around the world The rankings have been updated using specific methodology explained in the introduction Geographic and data notes are also included to provide context State Rankings compares every state and Washington DC in the following areas Agriculture Population Economy Environment Government finance Crime Education Geography Social welfare Defense Health Energy Housing

World University Rankings and the Future of Higher Education Downing, Kevin, Ganotice, Jr., Fraide A., 2016-10-06 Delivering quality education to students while remaining competitive at an international level is only one of the many challenges universities face today To attain their goals universities must adopt new strategies to achieve academic excellence World University Rankings and the Future of Higher Education is a pivotal reference source for the latest scholarly research on the implementation of a ranking system for higher education institutions providing a thorough overview of the impacts of these rankings on educational quality Exploring the benefits and challenges of this system in a global context this book is ideally designed for academicians researchers students administrators and policy makers interested in the effects of university rankings in the education sector and beyond
