Fusion for Profit Sharan Jagpal, Shireen Jagpal, 2008-09-26 The corporate world is typically structured in silos. Managers urgently need to overcome this silo effect by fusing ideas across different functional areas in the firm. In *Fusion for Profit*, Sharan Jagpal, a well-known and highly respected multidisciplinary researcher and business consultant, explains in simple language using real-world examples how managers can use sophisticated concepts to fuse different functional areas in the firm, especially marketing and finance, to increase the firm's value. The author provides novel solutions to a wide range of complex business problems ranging from choosing pricing and bundling strategies to positioning and messaging strategies to measuring brand equity to measuring advertising productivity in a mixed media plan including Internet advertising to compensating a multiproduct sales force to measuring the potential gains and risks from mergers and acquisitions. These concepts are illustrated using case studies from a variety of firms in different industries including AT T, Coca Cola, Continental Airlines, General Electric, Home Depot, Southwest Airlines, and Verizon.

Point of Sale Daniel Herbert, Derek Johnson, 2019-12-13 *Point of Sale* examines media retail as a vital component in the study of popular culture. Derivatives Unlocked Philippe Dufournier, 2024-12-30 *Derivatives Unlocked: A Practitioner's Perspective* offers the reader a practical explanation of the key concepts behind the design of financial derivatives. Resolutely selective and user-friendly, this book constitutes a hands-on introduction to both the structuring and use cases of derivatives products in modern global finance. The book is organised around two parallel streams of content. On the one hand, the *Derivatives Toolbox* comes as a set of pricing rules that underpin the building blocks of most derivatives products: namely, discounting, duration, and convexity; interest rates and credit default swaps; forwards and options. The methodology is approachable, simplified whenever possible, and does not require advanced mathematical training. On the other hand, the *Case Studies*, largely inspired by real European corporate finance and corporate risk management situations, allow the reader to make explicit use of the techniques learned as he or she progresses through the *Toolbox* and to grasp the effective power of derivatives solutions.

Features: Easy to follow for non-specialists, helping them build a solid and empirical foundation to encourage continued learning. Provides a unique insight, balanced between the acquisition of technical tools and their practical applications. Contains numerous case studies and other support material, making it suitable for both students and practitioners.

The Pop Documentary Since 1980 Richard Wallace, 2025-07-10 In *The Pop Documentary Since 1980* Richard Wallace examines the representation of pop music musicians and music making in documentary film and television. He draws together conceptual frameworks from within and outside of film and television studies including performance studies, musicology, celebrity studies and fan studies to provide a critical interrogation of the central issues in this genre. A common criticism of the music documentary is that it lacks artistic integrity because of its close affiliation with its subject. Wallace argues that music documentaries can be artful and conceptually complex and be part of a broader process of image curation under the control of the artist and their management. This contradiction is key to the form's vitality and Wallace explores two competing lines of enquiry. First, the contribution that such documentaries make to the public perception of their subjects. Second, he argues that its official status does not preclude music documentaries from being artistic or engaging with the theoretical questions that underpin documentary media more broadly. Other issues addressed include how documentaries about song writing attempt to represent intangible concepts like creativity and inspiration, how the experiential and affective aspects of music are communicated through the visual image, ethical considerations. Each of these conceptual questions is examined through detailed analysis of a variety of music documentaries ranging from *Stop Making Sense* to *Tokyo Idols* via *Beyoncé* and *The Beatles*.
