With AI demonstrates how to harness the power of AI to help every student thrive *Artificial Intelligence in Animal Behaviour, Veterinary Behaviour and Neurology* Holger Andreas Volk, Jasmin Nicole Nessler, Anna Zamansky, Sebastian Meller, Annika Bremhorst, 2025-08-18 The new leap innovation Artificial Intelligence AI will significantly accelerate the speed of science and translate into clinical practice faster than clinicians ever have been used to Machine and deep learning techniques are now readily available to analyze large and complex data sets providing veterinary scientists with a tool to not only better understand complex behaviour traits and neurological conditions but also to delve into the nuances of animal behaviour itself AI can now write plausible sounding text recognize written or spoken human words recognize objects in images or analyze large amounts of data Different fields of applications are known so far such as improving and speeding up interpretation of radiologic findings interpretation of electroencephalography diagnosis of autism in children objectifying ataxia in dogs detecting pain in cats and assessing and characterizing animal behaviours across species At the time of writing more than 500 AI based algorithms have been approved by the FDA for human medicine most of which are used in radiology and neurology In veterinary neurology and animal behavioural science only a limited amount of research on AI has been done so far Most algorithms presented are merely fragments of usable programs and are not suitable for clinical application Therefore ready to use applications are rare yet essential for implementing AI into everyday routine diagnostic work ups scientific research and animal behavioural assessments The research topic will help to unite current efforts and provide a collection of articles to address some of the current scientific and behavioural gaps In the future a clinician might have a clinical decision support tool that generates accurate estimations of likely outcomes of neurological disease and animal behaviour combining anamnestic behavioural clinical pathology and imaging information We are interested in original research systematic reviews and opinion papers not only about the scope and potential of AI for Veterinary Behavior and Neurology but also about the intersection of AI with the study of animal behaviour ethical considerations and pitfalls that the development of AI generated tools could present Potential themes therefore include but are not limited to AI to recognize monitor diagnose or characterise behaviour neurological deficits or conditions including a detailed analysis of animal behaviour across a variety of contexts and species AI to assess behavioural states in both clinical and natural environments AI to interpret scientific clinical data sets such as clinical pathology omics imaging EEG data and behaviour metrics Ethical and legal considerations when applying or using AI tools in the study of animal behaviour and veterinary medicine Potential of AI to enhance clinical practice in veterinary behavioural medicine veterinary neurology and animal behaviour research Potential of AI enhanced diagnostic and behavioural assessment tools with animals **Co-Intelligence** Ethan Mollick, 2024-04-02 AN INSTANT NEW YORK TIMES BESTSELLER From Wharton professor and author of the popular One Useful Thing Substack newsletter Ethan Mollick comes the definitive playbook for working learning and living in the new age of AI Something new entered our world in November 2022 the first general purpose AI that could pass for a human and do

the kinds of creative innovative work that only humans could do previously Wharton professor Ethan Mollick immediately understood what ChatGPT meant after millions of years on our own humans had developed a kind of co intelligence that could augment or even replace human thinking Through his writing speaking and teaching Mollick has become one of the most prominent and provocative explainers of AI focusing on the practical aspects of how these new tools for thought can transform our world In Co Intelligence Mollick urges us to engage with AI as co worker co teacher and coach He assesses its profound impact on business and education using dozens of real time examples of AI in action Co Intelligence shows what it means to think and work together with smart machines and why it s imperative that we master that skill Mollick challenges us to utilize AI s enormous power without losing our identity to learn from it without being misled and to harness its gifts to create a better human future Wide ranging hugely thought provoking optimistic and lucid Co Intelligence reveals the promise and power of this new era

The 21st Century Brain Richard Restak,2025-11-18 Discover the Influences of Social Media Artificial Intelligence AI Climate Change Stress and More on Our Brains and Behavior Unique to the Twenty first Century During the past twenty five years we ve encountered powerful influences for good and bad on brain function and even brain structure Consider the changes that have already taken place in how we communicate During the last half of the twentieth century images displaced words as the common parlance of communication On the nightly news we ve become accustomed to watching images drawn from video cameras used by law enforcement and thanks to a proliferating number of cellphones everyday use Yet AI is turning the traditional dynamic that images carry more weight than words seeing is believing upside down because we now have to question the authenticity of images We are finding ourselves forced to adjust to a world where what we see is not always what s really happening Next consider the effects of our changing environment on our brains and our behavior There is good reason to believe that a link exists between an increase in global temperature and suicide Wildfires becoming more and more common thanks to climate change affect air quality which is often undetectable by the average person until it reaches toxic levels Studies have proven that wildfire smoke is affecting our brains and potentially causing disease Perhaps the greatest twenty first century contributor to changes in brain function is stress Due to many factors explored in the book it s likely that levels of mental and emotional instability are on the horizon that can only be fully understood by focusing on the changes in the human brain brought about by these unparalleled levels of stress The brain is always evolving The 21st Century Brain will describe those influences on brain and behavior that are unique to this century as well as available preventive measures to mitigate some of these factors This book is a quintessential study on how our brains are uniquely changing in the twenty first century as well as a guide to the personal and collective measures that can be taken to eliminate these factors or reduce their impact
