Programming Large Language Models with Azure Open AI Francesco Esposito, 2024-04-03 Use LLMs to build better business software applications Autonomously communicate with users and optimize business tasks with applications built to make the interaction between humans and computers smooth and natural Artificial Intelligence expert

Francesco Esposito illustrates several scenarios for which a LLM is effective crafting sophisticated business solutions shortening the gap between humans and software equipped machines and building powerful reasoning engines Insight into prompting and conversational programming with specific techniques for patterns and frameworks unlock how natural language can also lead to a new advanced approach to coding Concrete end to end demonstrations featuring Python and ASP NET Core showcase versatile patterns of interaction between existing processes APIs data and human input Artificial Intelligence expert Francesco Esposito helps you Understand the history of large language models and conversational programming Apply prompting as a new way of coding Learn core prompting techniques and fundamental use cases Engineer advanced prompts including connecting LLMs to data and function calling to build reasoning engines Use natural language in code to define workflows and orchestrate existing APIs Master external LLM frameworks Evaluate responsible AI security privacy and accuracy concerns Explore the AI regulatory landscape Build and implement a personal assistant Apply a retrieval augmented generation RAG pattern to formulate responses based on a knowledge base Construct a conversational user interface For IT Professionals and Consultants For software professionals architects lead developers programmers and Machine Learning enthusiasts For anyone else interested in natural language processing or real world applications of human like language in software

Building Agentic AI Systems Anjanava Biswas, Wrick Talukdar, 2025-04-21 Master the art of building AI agents with large language models using the coordinator worker and delegator approach for orchestrating complex AI systems Free with your book PDF Copy AI Assistant and Next Gen Reader Key Features Understand the foundations and advanced techniques of building intelligent autonomous AI agents Learn advanced techniques for reflection introspection tool use planning and collaboration in agentic systems Explore crucial aspects of trust safety and ethics in AI agent development and applications Book Description Gain unparalleled insights into the future of AI autonomy with this comprehensive guide to designing and deploying autonomous AI agents that leverage generative AI GenAI to plan reason and act Written by industry leading AI architects and recognized experts shaping global AI standards and building real world enterprise AI solutions it explores the fundamentals of agentic systems detailing how AI agents operate independently make decisions and leverage tools to accomplish complex tasks Starting with the foundations of GenAI and agentic architectures you ll explore decision making frameworks self improvement mechanisms and adaptability The book covers advanced design techniques such as multi step planning tool integration and the coordinator worker and delegator approach for scalable AI agents Beyond design it addresses critical aspects of trust safety and ethics ensuring AI systems align with human values and operate transparently Real world applications illustrate how agentic AI transforms industries such as automation finance and healthcare With deep insights into AI frameworks prompt engineering and multi agent collaboration this book equips you to build next generation adaptive scalable AI agents that go beyond simple task execution and act with minimal human intervention What you will learn Master the core principles of GenAI and agentic systems Understand how AI agents operate

reason and adapt in dynamic environments Enable AI agents to analyze their own actions and improvise Implement systems where AI agents can leverage external tools and plan complex tasks Apply methods to enhance transparency accountability and reliability in AI Explore real world implementations of AI agents across industries Who this book is for This book is ideal for AI developers machine learning engineers and software architects who want to advance their skills in building intelligent autonomous agents It s perfect for professionals with a strong foundation in machine learning and programming particularly those familiar with Python and large language models While prior experience with generative AI is beneficial the book covers foundational concepts for those new to agentic systems GPT-3 Sandra Kublik,Shubham Saboo,2022-07-11 GPT 3 NLP with LLMs is a unique pragmatic take on Generative Pre trained Transformer 3 the famous AI language model launched by OpenAI in 2020 This model is capable of tackling a wide array of tasks like conversation text completion and even coding with stunningly good performance Since its launch the API has powered a staggering number of applications that have now grown into full fledged startups generating business value This book will be a deep dive into what GPT 3 is why it is important what it can do what has already been done with it how to get access to it and how one can build a GPT 3 powered product from scratch This book is for anyone who wants to understand the scope and nature of GPT 3 The book will evaluate the GPT 3 API from multiple perspectives and discuss the various components of the new burgeoning economy enabled by GPT 3 This book will look at the influence of GPT 3 on important AI trends like creator economy no code and Artificial General Intelligence and will equip the readers to structure their imaginative ideas and convert them from mere concepts to reality *The Computational Content Analyst* Chris J. Vargo,2024-12-02 Most digital content whether it be thousands of news articles or millions of social media posts is too large for the naked eye alone Often the advent of immense datasets requires a more productive approach to labeling media beyond a team of researchers This book offers practical guidance and Python code to traverse the vast expanses of data significantly enhancing productivity without compromising scholarly integrity We ll survey a wide array of computer based classification approaches focusing on easy to understand methodological explanations and best practices to ensure that your data is being labeled accurately and precisely By reading this book you should leave with an understanding of how to select the best computational content analysis methodology to your needs for the data and problem you have This guide gives researchers the tools they need to amplify their analytical reach through the integration of content analysis with computational classification approaches including machine learning and the latest advancements in generative artificial intelligence AI and large language models LLMs It is particularly useful for academic researchers looking to classify media data and advanced scholars in mass communications research media studies digital communication political communication and journalism Complementing the book are online resources datasets for practice Python code scripts extended exercise solutions and practice quizzes for students as well as test banks and essay prompts for instructors Please visit www.routledge.com/9781032846354 **Business Case Studies with Management**

lessons -Volume 1 Dr. Sanjeevni Gangwani,2025-05-12 This book is very useful for teaching any management course through case studies Cases are written in a very simple language so that all students at the graduate level post graduate level can understand its application Case studies are very important to be taken for teaching management in any type of course as it immerses students in real world scenarios fostering critical thinking problem solving and decision making skills while also bridging the gap between theory and practice Case studies present complex real life situations or problems that managers have faced allowing students to analyze discuss and propose solutions They encourage active participation and engagement moving beyond passive learning by placing students in the role of decision makers The emphasis is on the analytical process and the reasoning behind decisions rather than solely on finding a correct answer Case studies can encompass various management disciplines allowing for a holistic understanding of organizational challenges They are a form of problem based learning where students learn by grappling with real world problems There are various benefits of using case studies in teaching management courses Case studies enhance critical thinking analytical abilities communication skills and interpersonal skills Students practice making decisions under pressure weighing different options and understanding the consequences of their choices They bridge the gap between theory and practice allowing students to apply their knowledge to real world scenarios The real world nature of case studies makes learning more engaging and relevant for students Case studies encourage open discussion and debate fostering a collaborative learning environment Successfully navigating complex case studies can build students confidence in their abilities as future managers This book consists of diverse case studies related to various sectors It also includes the case objective overview of company summary and conclusion and questions for discussion I hope management faculty in all types of business school worldwide will find this comprehensive book on business case studies very helpful for class room teaching group discussions and even for giving assignment to students for internal assessment I wish you all a happy learning process and I hope all my efforts in compiling varied cases will contribute for better management learning and student engagement

Large Language Models

Projects Pere Martra,2024-09-18 This book offers you a hands on experience using models from OpenAI and the Hugging Face library You will use various tools and work on small projects gradually applying the new knowledge you gain The book is divided into three parts Part one covers techniques and libraries Here you ll explore different techniques through small examples preparing to build projects in the next section You ll learn to use common libraries in the world of Large Language Models Topics and technologies covered include chatbots code generation OpenAI API Hugging Face vector databases LangChain fine tuning PEFT fine tuning soft prompt tuning LoRA QLoRA evaluating models and Direct Preference Optimization Part two focuses on projects You ll create projects understanding design decisions Each project may have more than one possible implementation as there is often not just one good solution You ll also explore LLMOps related topics Part three delves into enterprise solutions Large Language Models are not a standalone solution in large corporate environments

they are one piece of the puzzle You ll explore how to structure solutions capable of transforming organizations with thousands of employees highlighting the main role that Large Language Models play in these new solutions This book equips you to confidently navigate and implement Large Language Models empowering you to tackle diverse challenges in the evolving landscape of language processing What You Will Learn Gain practical experience by working with models from OpenAI and the Hugging Face library Use essential libraries relevant to Large Language Models covering topics such as Chatbots Code Generation OpenAI API Hugging Face and Vector databases Create and implement projects using LLM while understanding the design decisions involved Understand the role of Large Language Models in larger corporate settings Who This Book Is For Data analysts data science Python developers and software professionals interested in learning the foundations of NLP LLMs and the processes of building modern LLM applications for various tasks **Empire of AI** Karen

Hao,2025-05-20 A NEW YORK TIMES BESTSELLER An eye opening account of the tech arms race shaping out planet from an award winning journalist and AI insider to the world of Sam Altman and OpenAI When longtime AI expert and journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission it was meant its leader Sam Altman told us to act as a check against more purely market forces But the core truth of this massively disruptive sector is that it requires an unprecedented amount of proprietary resources the compute power of scarce high end chips the sheer volume of data that needs to be amassed at scale the humans on the ground cleaning it up for sweatshop wages throughout the Global South and a truly alarming spike in the need for energy and water underlying everything We have entered a new ominous age of empire with OpenAI setting a breakneck pace as a small group of the most valuable companies in human history try to chase it down In exhilarating prose and with unparalleled access to those closest to Sam Altman Hao recounts the meteoric rise of OpenAI and shows us the sinister impact that this industry is having on society **Building an Application Development Framework** Ivan Padabed,Roman
