Intonation in Romance Sónia Frota, Pilar Prieto, 2015-06-04 This book offers the first comprehensive description of the prosody of nine Romance languages that takes into account internal dialectal variation Teams of experts examine the prosody of Catalan French Friulian Italian Occitan Portuguese Romanian Sardinian and Spanish using the Autosegmental Metrical framework of intonational phonology and the Tones and Breaks Indices ToBI transcription system The chapters all share a common methodology based on a common Discourse Completion Task questionnaire and provide extensive empirical data The authors then analyse how intonation patterns work together with other grammatical means such as syntactic constructions and discourse particles in the linguistic marking of a varied set of sentence types and pragmatic meanings across Romance languages The ToBI prosodic systems and annotations proposed for each language are based both on a phonological analysis of the target language as well as on the shared goal of using ToBI analyses that are comparable across Romance languages This book will pave the way for more systematic typological comparisons of prosody across both Romance and non Romance languages A Romance of the Sea-serpent, Or, The Ichthyosaurus Eugene Batchelder, 1850

The Cambridge History of the Romance Languages: Volume 2, Contexts Martin Maiden, John Charles Smith, Adam Ledgeway, 2013-10-24 What is the origin of the Romance languages and how did they evolve When and how did they become different from Latin and from each other Volume 2 of The Cambridge History of the Romance Languages offers fresh and original reflections on the principal questions and issues in the comparative external histories of the Romance languages It is organised around the two key themes of influences and institutions exploring the fundamental influence of contact with and borrowing from other languages including Latin and the cultural and institutional forces at work in the establishment of standard languages and norms of correctness A perfect complement to the first volume it offers an external history of the Romance languages combining data and theory to produce new and revealing perspectives on the shaping of the Romance languages *Gender from Latin to Romance* Michele Loporcaro, 2018 This book explores grammatical gender in the Romance languages and dialects and its evolution from Latin Michele Loporcaro investigates the significant diversity found in the Romance varieties in this regard he draws on data from the Middle Ages to the present from all the Romance languages and dialects discussing examples from Romanian to Portuguese and crucially also focusing on less widely studied varieties such as Sursilvan Neapolitan and Asturian The investigation first reveals that several varieties display more complex systems than the binary masculine feminine contrast familiar from modern French or Italian Moreover it emerges that traditional accounts whereby neuter gender was lost in the spoken Latin of the late Empire cannot be correct instead the neuter gender underwent a range of different transformations from Late Latin onwards which are responsible for the different systems that can be observed today across the Romance languages The volume provides a detailed description of many of these systems which in turns reveals a wealth of fascinating data such as varieties where husbands are feminine and

others where wives are masculine dialects in which nouns overtly mark gender but only in certain syntactic contexts and one Romance variety Asturian in which it appears that grammatical gender has split into two concurrent systems The volume will appeal to linguists from a range of backgrounds including Romance linguistics historical linguistics typology and morphosyntax and is also of relevance to those working in sociology gender studies and psychology
