Communicating Science and Technology Through Online Video Bienvenido León, Michael Bourk, 2018-03-19 Online video's unique capacity to reach large audiences makes it a powerful tool to communicate science and technology to the general public. The outcome of the international research project Videonline, this book provides a unique insight into the key elements of online science videos such as narrative trends, production characteristics and issues of scientific rigor. It offers various methodological approaches: a literature review, content analysis and interviews and surveys of expert practitioners to provide information on how to maintain standards of rigour and technical quality in video production. **Resources in**

Education, 2001-04 Online Education Anthony G. Picciano, 2018-07-17 Online Education is a comprehensive exploration of blended and fully online teaching platforms addressing history, theory, research, planning and practice. As colleges, universities and schools around the world adopt large-scale technologies and traditional class models shift into seamless, digitally interactive environments, critical insights are needed into the implications for administration and pedagogy. Written by a major contributor to the field, this book contextualizes online education in the past and present before analyzing its fundamental changes to instruction, program integration, social interaction, content construction, networked media, policy and more. A provocative concluding chapter speculates on the future of education as the sector becomes increasingly dependent on learning technologies. **ENC Focus**, 2001 Promoting Active Learning through the Flipped Classroom Model

Keengwe, Jared, 2014-01-31 This book focuses on an in-depth assessment of strategies and instructional design practices appropriate for the flipped classroom model, highlighting the benefits, shortcomings, perceptions and academic results of the flipped classroom model.
