Advances in Artificial Intelligence, Big Data and Algorithms Gheorghe Grigoras, Pascal Lorenz, 2023-12-15 Computers and automation have revolutionized the lives of most people in the last two decades, and terminology such as algorithms, big data, and artificial intelligence have become part of our everyday discourse. This book presents the proceedings of CAIBDA 2023, the 3rd International Conference on Artificial Intelligence, Big Data, and Algorithms, held from 16-18 June 2023 as a hybrid conference in Zhengzhou, China. The conference provided a platform for some 200 participants to discuss the theoretical and computational aspects of research in artificial intelligence, big data, and algorithms, reviewing the present status and future perspectives of the field. A total of 362 submissions were received for the conference, of which 148 were accepted following a thorough double-blind peer review. Topics covered at the conference included artificial intelligence tools and applications, intelligent estimation and classification, representation formats for multimedia, big data, high performance computing, and mathematical and computer modeling, among others. The book provides a comprehensive overview of this fascinating field, exploring future scenarios and highlighting areas where new ideas have emerged over recent years. It will be of interest to all those whose work involves artificial intelligence, big data, and algorithms.

Regulatory Challenges of AI Governance in the Era of ChatGPT Toriqul Islam, 2024-12-06 The increasing integration of artificial intelligence (AI) and particularly of large language models (LLMs) like ChatGPT into human interactions raises significant ethical and social concerns across a broad spectrum of human activity. Therefore, it is important to use AI responsibly and ethically and to be critical of the information it generates. This book, the first comprehensive work to provide a structured framework for AI governance, focuses specifically on the regulatory challenges of LLMs like ChatGPT. It presents an extensive framework for understanding AI regulation, addressing its societal and ethical impacts and exploring potential policy directions. Through 11 meticulously researched chapters, the book examines AI's historical development, industry applications, socio-ethical concerns, and legal challenges. Advocating for a human-centric, risk-based regulatory approach, emphasising transparency, public participation, and ongoing monitoring, the book covers such aspects of AI and its governance as the following: a comprehensive overview of the history and mechanics of AI; widespread public misconceptions surrounding ChatGPT; ethical considerations, e.g., misinformation, accountability, and transparency; societal implications, e.g., job displacement, critical thinking, and malicious use; privacy concerns; intellectual property challenges; healthcare application;

dilemmas interplay between LLMs and finance and cross border regulatory challenges Throughout the author identifies significant gaps in existing legal frameworks and explores potential policy directions to bridge these gaps The book offers invaluable insights and recommendations for policymakers legal experts academics students technologists and anyone interested in AI governance It underscores the need for a collaborative effort and meaningful dialogue among industry leaders academia and civil society worldwide to promote responsible and ethical development and use of AI for the benefit of humanity

Artificial Intelligence-Enabled Digital Twin for Smart Manufacturing Amit Kumar Tyagi, Shrikant Tiwari, Senthil Kumar Arumugam, Avinash Kumar Sharma, 2024-10-15 An essential book on the applications of AI and digital twin technology in the smart manufacturing sector In the rapidly evolving landscape of modern manufacturing the integration of cutting edge technologies has become imperative for businesses to remain competitive and adaptive Among these technologies Artificial Intelligence AI stands out as a transformative force revolutionizing traditional manufacturing processes and making the way for the era of smart manufacturing At the heart of this technological revolution lies the concept of the Digital Twin an innovative approach that bridges the physical and digital realms of manufacturing By creating a virtual representation of physical assets processes and systems organizations can gain unprecedented insights optimize operations and enhance decision making capabilities This timely book explores the convergence of AI and Digital Twin technologies to empower smart manufacturing initiatives Through a comprehensive examination of principles methodologies and practical applications it explains the transformative potential of AI enabled Digital Twins across various facets of the manufacturing lifecycle From design and prototyping to production and maintenance AI enabled Digital Twins offer multifaceted advantages that redefine traditional paradigms By leveraging AI algorithms for data analysis predictive modeling and autonomous optimization manufacturers can achieve unparalleled levels of efficiency quality and agility This book explains how AI enhances the capabilities of Digital Twins by creating a powerful tool that can optimize production processes improve product quality and streamline operations Note that the Digital Twin in this context is a virtual representation of a physical manufacturing system including machines processes and products It continuously collects real time data from sensors and other sources allowing it to mirror the physical system's behavior and performance What sets this Digital Twin apart is the incorporation of AI algorithms and machine learning techniques that enable it to analyze and predict outcomes recommend improvements and autonomously make adjustments to enhance manufacturing efficiency This book outlines essential elements like real time monitoring of machines predictive analytics of machines and data optimization of the resources quality control of the product resource management decision support timely or quickly accurate decisions Moreover this book elucidates the symbiotic relationship between AI and Digital Twins highlighting how AI augments the capabilities of Digital Twins by infusing them with intelligence adaptability and autonomy Hence this book promises to enhance competitiveness reduce operational costs and facilitate innovation in the manufacturing industry By harnessing AI's

capabilities in conjunction with Digital Twins manufacturers can achieve a more agile and responsive production environment ultimately driving the evolution of smart factories and Industry 4.0 Audience This book has a wide audience in computer science artificial intelligence and manufacturing engineering as well as engineers in a variety of industrial manufacturing industries It will also appeal to economists and policymakers working on the circular economy clean tech investors industrial decision makers and environmental professionals
