Linguistische Berichte Heft 282 Markus Steinbach,Nina-Kristin Meister,Günther Grewendorf,Arnim von Stechow,2025-05-19 Beitr ge aus Forschung und Anwendung Miriam Brinkmann Antonia F nter Laura d Aurizio Natascha M ller Die Repr sentation von Genus im Franz sischen Psycholinguistische Evidenz f r ein dreigliedriges System Abstract Previous studies generally considered grammatical gender in French as a binary system consisting of a masculine and a feminine gender both reflected beyond the nouns themselves on e g determiners and adjectives However a glance at the French system reveals that the exist ence of

two forms does not provide adequate evidence for the assumption of a bipartite underlying system (Loporcaro 2020) and that there is still evidence for inflectional classes in French as well (Lowenstamm 2012). The present study considers the possibility of a tripartite gender system in French by taking into consideration the results of two psycholinguistic experiments. The first experiment indicates that French native speakers process feminine nouns faster and more accurately than masculine nouns. Since this result is surprising, former Latin neuter nouns were selected from the masculine nouns of the first experiment and considered as a separate group in a second experiment. This group of nouns is processed significantly longer and less accurately than feminine nouns and the remaining masculine nouns. The results of these experiments allow the discussion of which form should be considered marked in the French system and of why the tripartite gender system of Latin survived in nowadays French. Moreover, the notion of default as well as the role of a default gender in language processing are discussed. Considering the French tripartite gender system as proposed in Lowenstamm (2008) in the framework of the epigenetic model by Biberauer, Holmberg, Roberts, and Sheehan (2014), a parametric description of language change is proposed. The results of the current study allow a new perspective on the French gender system and provide insights into the role of the grammatical gender and inflectional class features in French.

Kalle Glauch: Expressive punctuation: how punctuation changes the perceived valence of discourse referents in computer mediated communication. *Praktisches aus Forschung und Lehre*. Abstract: This article explores the role of five expressive punctuation marks: multiple exclamation marks, exclamation mark, full stop, ellipsis, and null punctuation as cues to writer attitudes in CMC. Specifically, it investigates how the underlying meaning of expressive punctuation influences the perceived emotional valence of discourse referents within exclamative constructions. In a 1x5 between subjects repeated measures design, valence ratings were collected for 120 discourse referents embedded in exclamative constructions manipulated by message final punctuation mark. e.g. "What a view on a 1 (negative) to 9 (positive) scale." For inherently positive discourse referents, a clear positivity hierarchy in the overall valence of embedded discourse referents emerges, indicating a differential influence of punctuation on perceived valence: multiple exclamation marks > exclamation mark > null punctuation > full stop > ellipsis. For inherently negative discourse referents, the differences between the conditions are less distinct. Notably, only multiple exclamation marks yield a significantly lower valence rating within that range of values. While the findings for inherently positive referents align with prior assumptions on the expressive meaning of different punctuation marks in CMC, the observed pattern for inherently negative referents cannot be readily explained by existing literature on expressive punctuation in CMC.

Linguistische Berichte Heft 283 Markus Steinbach, Nina-Kristin Meister, Günther Grewendorf, Arnim von Stechow, 2025-09-01. Vorwort. Felicitas Otte. Markus Steinbach, Nina Kristin Meister. Auf dem Weg zur digitalen Barrierefreiheit in den Linguistischen Berichten: Errungenschaften und Ziele. Aktuelle Tendenzen in der Linguistik. Silva H. Ladewig. Aktuelle Trends und Entwicklungen in der linguistischen Gesten- und Multimodalitätsforschung. Abstract: In the late 20th century, gestures were mainly regarded as part of pragmatics, separate from core

linguistic fields like phonetics morphology syntax and semantics This division was rooted in Chomsky s 1965 distinction between linguistic competence and performance with only the former being considered within the scope of linguistics This paper demonstrates that gestures have now become central to core linguistic research It examines recent developments in gesture and multimodality research within linguistics beginning with a discussion of gesture concepts followed by an introduction to gestures as an empirical phenomenon Recent findings on gestural modality and its integration into spoken language are presented highlighting three key themes the role of gestures in emphasizing information their integration into syntax and prosody and the emergence and stabilization of gestural and multimodal patterns These developments suggest a growing recognition of gesture as integral to linguistic study Beitr ge aus Forschung und Anwendung Sebastian Walter Investigations on the at issue status of viewpoint gestures Abstract Most accounts of the semantic contribution of co speech gestures posit that they contribute not at issue meaning by default e g Ebert Ebert 2014 This claim has been experimentally validated by Ebert Ebert H rnig 2020 for gestures conveying information about an object s size or shape In this article the findings from two rating studies are reported investigating the at issue status of character and observer viewpoint gestures CVGs and OVGs respectively McNeill 1992 It is questionable whether the findings of Ebert Ebert H rnig s 2020 study hold equally strong for CVGs and OVGs as especially the former gesture type differs in size from the gestures used in their study The results of the studies suggest that while both gesture types contribute not at issue meaning by default CVGs can shift more toward the at issue dimension than OVGs if they provide information relevant to the question under discussion in line with a gradient approach to at issuehood Barnes Ebert 2023 Winfried Thielmann Tempus und Zeit Ph nomene Konzepte linguistische Kategorienbildung Abstract It is widely held that temporal morphemes refer to temporal structures of reality in the way presented by Reichenbach in his Symbolic Logic 1947 One of the earliest elaborations of the concept of time namely the one found in Aristotle s Physics however suggests that time is not a property of nature but a complex linguistic elaboration of the human mind in order to come to terms with nature Counting deictic focusing acts with respect to repeated constellations of a reference movement e g meridian transits of the sun the human psyche establishes a reference space that has no reality outside the human psyche Because of this it is argued that it is quite implausible that grammatical morphemes should express a complex notion that relies on things such as number and a numeral system but rather that it is later reifications of the concept of time gave rise to the assumption that linguistic structures encode temporal logic As it will be shown temporal morphemes of German can indeed be described without reference to time as they have a much more basic meaning Hence it may be meaningful to ask the question if linguistic thinking might in general be misled in believing that complex categories such as time or for instance causality are encoded in grammatical structures

A Critical Evaluation of the Criticisms against Neutrosophic Statistical Methods Muhammad

Aslam, Abdulrahman AlAita, Florentin Smarandache, Neutrosophic statistical analysis has gained attention for incorporating the degree of indeterminacy when analyzing imprecise and interval data under uncertainty an aspect often overlooked by classical statistics fuzzy statistical analysis and interval statistics Recently critical discussions have emerged regarding the use and applications of neutrosophic statistics with some questioning its usefulness and validity In this paper we present a critical assessment of the existing literature focusing on areas where misunderstandings and misinterpretations of neutrosophic statistical methods have occurred We also examine flawed comparisons made between the results of neutrosophic statistics and interval statistics Furthermore substantial issues have been identified in the current simulation both in its application and in the comparison of results The objective of this paper is to highlight these key concerns and provide clarity for researchers working in this area helping them to better understand the appropriate applications of neutrosophic statistical methods
