Farm Act's Regional Equity Provision Cynthia Nickerson, 2010-10 The 2002 and 2008 Farm Acts increased funding for conservation programs that provide financial assistance to farmers to implement conservation practices on working farmland. Along with seeking environmental benefits, these programs have a goal of spreading conservation funding equitably across States. This study examines evidence of the impacts of the Regional Equity provision of the 2002 Farm Act and explores the tradeoffs that can occur among conservation program goals when legislation gives primacy to fund allocation. The study found that cross State shifts in funding reduced the acres receiving conservation treatment for many resource problems but increased the net economic benefits from treatments on some of them.
