When Science Offers Salvation Rebecca Dresser, 2001-03-22 Biomedical research today has a high public profile largely because of patient advocacy. Following in the footsteps of HIV/AIDS activists, advocates representing an array of patient groups are now vocal partners in the research enterprise. Advocates want research practices and policies to be more responsive to the people who must live with the burdens of illness. This book shows how advocates have transformed health research often but not always for the better. Dresser is the first to examine patient advocacy through the lens of research ethics. She reveals the many ways in which a quest for cures and improved therapies shapes advocacy work. She exposes the bright and dark sides of patients' expanded opportunities to enroll in clinical trials and join researchers in planning and evaluating studies. She considers the virtues and drawbacks of giving patients more influence over how the government invests its research dollars. She argues that advocates should do more to promote ethical human studies and responsible media reporting about research. Patient advocates can help make research more ethical but advocacy raises ethical issues of its own. This book clearly and vividly recounts the advocacy contribution to research and explores the thorny ethical issues facing research advocates. National Science Policy, H. Con. Res. 666 United States. These far-reaching changes require companies to make rapid adaptations in order to achieve optimal situations which can no longer be developed as they did in the past. To help academics and managers understand the new fields of study and research within strategic management, Javier Martínez Falcó, Assistant Professor at the University of Alicante, has written a groundbreaking book, *New Perspectives and Possibilities in Strategic Management in the 21st Century: Between Tradition and Modernity*. This book is an essential guide for reflection and critique, offering insights into the new currents and challenges of the discipline, shedding light on the modernization of strategies in the corporate world. It addresses the renewal and future directions of the field, covering topics such as sustainability, circular economy, green innovation, and information and communication technologies, including blockchain, big data, artificial intelligence, and IoT. The book serves as a must-read for academics, academic students, and policymakers interested in gaining a deeper understanding of current issues impacting deliberate business planning and organization. It also serves as a valuable support material for undergraduate and master's business students, providing a comprehensive understanding of the new fields of study in the discipline.
