Mobile Artificial Intelligence Projects Karthikeyan NG, Arun Padmanabhan, Matt R. Cole, 2019-03-30 Learn to build end to end AI apps from scratch for Android and iOS using TensorFlow Lite CoreML and PyTorch Key Features Build practical real world AI projects on Android and iOS Implement tasks such as recognizing handwritten digits sentiment analysis and more Explore the core functions of machine learning deep learning and mobile vision Book Description We re witnessing a revolution in Artificial Intelligence thanks to breakthroughs in deep learning Mobile Artificial Intelligence Projects empowers you to take part in this revolution by applying Artificial Intelligence AI techniques to design applications for natural language processing NLP robotics and computer vision This book teaches you to harness the power of AI in mobile applications along with learning the core functions of NLP neural networks deep learning and mobile vision It features a range of projects covering tasks such as real estate price prediction recognizing hand written digits predicting car damage and sentiment analysis You will learn to utilize NLP and machine learning algorithms to make applications more predictive proactive and capable of making autonomous decisions with less human input In the concluding chapters you will work with popular libraries such as TensorFlow Lite CoreML and PyTorch across Android and iOS platforms By the end of this book you will have developed exciting and more intuitive mobile applications that deliver a customized and more personalized experience to users What you will learn Explore the concepts and fundamentals of AI deep learning and neural networks Implement use cases for machine vision and natural language processing Build an ML model to predict car damage using TensorFlow Deploy TensorFlow on mobile to convert speech to text Implement GAN to recognize hand written digits Develop end to end mobile applications that use AI principles Work with popular libraries such as TensorFlow Lite CoreML and PyTorch Who this book is for Mobile Artificial Intelligence Projects is for machine learning professionals deep learning engineers AI engineers and software engineers who want to integrate AI technology into mobile based platforms and applications Sound knowledge of machine learning and experience with any programming language is all you need to get started with this book [Artificial Intelligence and Computer Vision for Ecological Informatics](#) Siddharth Singh Chouhan, Uday Pratap Singh, Akash Saxena, Akhilesh Tiwari, Sanjeev Jain, 2025-08-27 Ecological informatics more commonly known as Ecoinformatics is the study of environmental sciences and ecological information It is an emerging interdisciplinary framework for the management analysis and synthesis of ecological data with the help of advanced computational intelligence algorithms Management in this context is data acquisition preprocessing and sharing the data Analysis and synthesis are the process of extracting useful information and forecasting with the help of intelligent algorithms The aim of this book is to encapsulate concepts and theories of artificial intelligence and computer vision algorithms used for the evaluation of various ecological informatics applications It focuses on soft computing machine learning deep learning artificial intelligence bio inspired algorithms data analysis tools data visualization tools and computer vision algorithms used in ecological informatics The book covers remote

sensing applications water bodies evaluation agriculture mapping aquatic mapping forest management and terrestrial ecosystems The book will be useful to students researchers scientists and field experts in directing their work towards this domain to deliver and design models and prototypes for the benefit of society and the environment *A BASIC INTRODUCTION TO ARTIFICIAL INTELLIGENCE* Henry Harvin, The widespread usage of practical voice recognition machine translation autonomous vehicles and home robotics are just a few notable applications of AI technology There have been significant algorithms such as the checkers game solution Additionally there has been a lot of theoretical advancement notably in fields like computer vision machine learning and probabilistic reasoning The most crucial from our point of view is the ongoing evolution of how we approach the subject and consequently how we set up the book Introduction to AI Techniques for Renewable Energy System Suman Lata Tripathi, Mithilesh Kumar Dubey, Vinay Rishiwal, Sanjeevikumar Padmanaban, 2021-11-25 Introduction to AI techniques for Renewable Energy System Artificial Intelligence AI techniques play an essential role in modeling analysis and prediction of the performance and control of renewable energy The algorithms used to model control or predict performances of the energy systems are complicated involving differential equations enormous computing power and time requirements Instead of complex rules and mathematical routines AI techniques can learn critical information patterns within a multidimensional information domain Design control and operation of renewable energy systems require a long term series of meteorological data such as solar radiation temperature or wind data Such long term measurements are often non existent for most of the interest locations or wherever they are available they suffer from several shortcomings like inferior quality of data and insufficient long series The book focuses on AI techniques to overcome these problems It summarizes commonly used AI methodologies in renewable energy with a particular emphasis on neural networks fuzzy logic and genetic algorithms It outlines selected AI applications for renewable energy In particular it discusses methods using the AI approach for prediction and modeling of solar radiation seizing performances and controls of the solar photovoltaic PV systems Features Focuses on a significant area of concern to develop a foundation for the implementation of renewable energy system with intelligent techniques Showcases how researchers working on renewable energy systems can correlate their work with intelligent and machine learning approaches Highlights international standards for intelligent renewable energy systems design reliability and maintenance Provides insights on solar cell biofuels wind and other renewable energy systems design and characterization including the equipment for smart energy systems This book which includes real life examples is aimed at undergraduate and graduate students and academicians studying AI techniques used in renewable energy systems **A.I. Artificial intelligence, introduction to the issues and current trends** Pavel Bartoš, 2023-01-01 Artificial Intelligence AI often referred to by the acronym Artificial Intelligence is a fascinating and dynamically developing field that has far reaching implications for various sectors of human activity At its core it is the simulation of human intelligence in computer systems AI is capable of learning planning problem solving speech recognition

visual perception and many other cognitive functions that were previously considered the exclusive domain of human thought

Transforming Banking Infrastructure Services with Artificial Intelligence, Machine Learning, and Agentic AI: Modernizing Financial Systems in the Age of Automation

Bharath Somu, Cost Sharing, Capacity Investment and Pricing in Networks Anja Schedel, 2021-06-28 Anja Schedel analyzes two models in the field of algorithmic game theory which both constitute bilevel problems in networks The first model is a game theoretic variant of the well known Steiner forest problem and one is interested in an optimal sharing of the cost of the Steiner forest The author provides and partially exactly characterizes network structures which allow for cost minimal pure Nash equilibria The second model is motivated from privatized public roads in which private selfishly acting firms build roads and as compensation for their investment are allowed to set prices for using the roads For a basic model of this situation the author shows existence and uniqueness of pure Nash equilibria The existence result requires a non standard proof approach since techniques like Kakutani's fixed point theorem cannot be applied directly

Smart Grids for Smart Cities, Volume 1 O. V. Gnana Swathika,K. Karthikeyan,Sanjeevikumar Padmanaban,2023-07-05 SMART GRIDS for SMART CITIES Written and edited by a team of experts in the field this first volume in a two volume set focuses on an interdisciplinary perspective on the financial environmental and other benefits of smart grid technologies and solutions for smart cities What makes a regular electric grid

a smart grid It comes down to digital technologies that enable two way communication between a utility and its customers as opposed to the traditional electric grid where power flows in one direction Based on statistics and available research smart grids globally attract the largest investment venues in smart cities Smart grids and city buildings that are connected in smart cities contribute to significant financial savings and improve the economy The smart grid has many components including controls computers automation and new technologies and equipment working together These technologies cooperate with the electrical grid to respond digitally to our quickly changing electric demand The investment in smart grid technology also has certain challenges The interconnected feature of smart grids is valuable but it tremendously increases their susceptibility to threats It is crucial to secure smart grids wherein many technologies are employed to increase real time situational awareness and the ability to support renewables as well as system automation to increase the reliability efficiency and safety of the electric grid This exciting new volume covers all of these technologies including the basic concepts and the problems and solutions involved with the practical applications in the real world Whether for the veteran engineer or scientist the student or a manager or other technician working in the field this volume is a must have for any library
