A Guide for Researchers is an essential edited volume that navigates the complex ethical landscape of special education research. This guide provides a comprehensive overview of ethical principles and considerations unique to the field, emphasizing the importance of respecting the rights and dignity of individuals with disabilities. Each chapter offers practical insights and case studies addressing topics such as informed consent, confidentiality, and the balancing of risks and benefits. The book is an invaluable resource for researchers committed to conducting ethical, responsible, and impactful studies that advance knowledge and practice in special education.

Artificial Intelligence In Mass Communication: Transforming Media In The Digital Age Dr. Chanchal Sachdeva Suri, Ms. Harmeet Kaur Kochhar, Artificial Intelligence (AI) is revolutionizing mass communication by transforming how content is created, distributed, and consumed in the digital age. From AI-generated news articles and personalized content recommendations to automated video editing, chatbots, and deepfake technology, AI is reshaping journalism, advertising, social media, and public relations. It enhances efficiency, audience targeting, and user engagement while also raising ethical concerns about misinformation, bias, and job displacement. As AI continues to evolve, media professionals must adapt to these technological shifts, balancing innovation with responsibility to uphold truth, transparency, and human creativity in communication.

AI in Content Creation: Automated journalism, video editing, and scriptwriting.

Personalized Media Recommendation algorithms on platforms like YouTube, Netflix, Social Media.

Bots, Chatbots: Enhancing engagement and customer interaction.

Advertising Targeting: AI helps deliver hyper-targeted ads.

Data Analysis: Real-time audience behavior tracking and media analytics.

Deepfakes: Ethics Challenges around authenticity and misinformation.

Job Impact: AI may replace some roles but also creates new opportunities.

Media Automation: Streamlines workflows in newsrooms and broadcasting.

Proceedings of the 4th International Conference on Advances in Communication Technology and Computer Engineering (ICACTCE'24) Celestine Iwendi, Zakaria Boulouard, Natalia Kryvinska, 2025-07-11. This proceedings book offers a refined and comprehensive exploration of cutting-edge advancements in communication networks, computational intelligence, and smart applications, seamlessly blending theoretical insights with practical solutions. Each paper outlines objectives, challenges, proposed solutions, and key findings, enabling swift comprehension of complex topics. By adopting a problem-solving approach and including case studies, the book effectively demonstrates the application of advanced techniques in domains such as industry, healthcare, and smart cities. Addressing the demands of an evolving digital landscape, it highlights emerging technologies like artificial intelligence (AI), the Internet of Things (IoT), and autonomous systems, ensuring its relevance to both current challenges and future innovations. Covering a wide spectrum of topics, including network security, AI applications, IoT ecosystems, and smart technologies, the book serves as a comprehensive resource for understanding the innovations shaping the future of communication and computing. Targeted at graduate students, researchers, professors, and industry professionals, it functions as both an educational tool and a reference guide for those seeking to remain at the forefront of technological advancements. Featuring state-of-the-art

research contributions the book introduces new techniques algorithms and solutions to real world challenges complemented by structured insights into objectives problems and results Practical applications are brought to life through successful case studies in key areas like smart cities and healthcare illustrating the tangible impact of these innovations With contributions reviewed by a distinguished editorial team of leading researchers engineers and academics the book ensures credibility academic rigor and relevance By blending theoretical depth practical utility and expert validation this proceedings book is an indispensable resource for navigating the rapidly evolving fields of computing and communication technologies equipping readers with the knowledge and tools to excel in an increasingly digital and interconnected world

Artificial Intelligence in Chemical Engineering Farooq Sher, 2025-10-04 Artificial Intelligence in Chemical Engineering explores the integration of artificial intelligence AI into various facets of chemical engineering The book introduces historical information highlights current state and trends in AI applications and discusses challenges and opportunities within the field Foundational principles of AI and machine learning are thoroughly covered giving readers a solid understanding of basic AI principles machine learning algorithms and the crucial processes of model training and validation The book then delves into the critical phase of data acquisition and preprocessing for AI models addressing strategies for data collection ensuring data quality and techniques for feature engineering and selection Subsequent chapters cover a wide spectrum of AI applications in chemical engineering From supervised and unsupervised learning for process modeling to the advanced realm of deep learning applications this book explores neural networks convolutional and recurrent architectures and their real world applications in process optimization and analysis Navigates the dynamic intersection of AI and chemical engineering covering ethical considerations interdisciplinary applications and AI's impact on safety sustainability and innovation Bridges the gap between policy and implementation of AI in chemical engineering facilitating a harmonious integration of AI technologies and fostering responsible and effective use within the chemical engineering industry Offers a forward looking approach to guide professionals researchers and students in navigating the dynamic and transformative future of AI in chemical engineering
