Musicking TikTok Juan Bermúdez, 2024-12-12 This ethnographic work about TikTok's musicking in a glocal Austrian context complements and builds upon ethnomusicological assumptions, theories, and methods for the study of musical practices in digital spaces. An overview of elements that make up TikTok's interface as well as the technical performative possibilities that it allows, this book introduces a general categorization of existing performance types and how TikTokers appropriate the platform to make their music. It illustrates how some TikTokers became aware of and began using TikTok and it reviews some of the different strategies TikTokers apply to learn how to use the application and successfully develop their performances. Bermúdez explores how performers move from being ordinary users to becoming TikTokers, developing and performing an identity he calls TikTok Persona. Moreover, he discusses how some TikTok practices can and have occurred across multiple interconnected platforms and he examines how localities are articulated and negotiated in these contexts. Bermúdez argues for an understanding of musicking as a multimedia practice that different actors create and experience individually in everyday synchronous and asynchronous physical and digital situations. The so-called TikTokers create a sense of identity and community through their performances. This study suggests that a digital performance can be, aside from a representation of reality, an integral part of it, serving as a fundamental space for constructing and performing identity.

Dance in US Popular Culture Jennifer Atkins, 2023-07-21 This innovative textbook applies basic dance history and theory to contemporary popular culture examples in order to examine our own ways of moving in and through culture. By drawing on material relevant to students, *Dance in US Popular Culture* successfully introduces students to critical thinking around the most personal of terrain: our bodies and our identities. The book asks readers to think about what embodied knowledge we carry with us and how we can understand history and society through that lens: what stereotypes and accompanying expectations are embedded in performance related to gender and/or race; for instance, how such expectations are reinforced, negotiated, challenged, embraced, or rescripted by performers and audiences; how readers articulate their own sense of complex identity within the constantly shifting landscape of popular culture; how this shapes an active sense of their everyday lives; and how this can act as a springboard towards dismantling systems of oppression. Through readings, questions, movement analyses, and assignment prompts that take students from computer to nightclub and beyond, *Dance in US Popular Culture* readers develop their own cultural sense of dance and the moving body's sociopolitical importance while also determining how dance is fundamentally applicable to their own identity. This is the ideal textbook for high school and undergraduate students of dance and dance studies in BA and BFA courses as well as those studying popular culture from interdisciplinary perspectives including cultural studies, media studies, communication studies, theater, and performance studies. Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license.

Comparative Data Law Josef Drexler, Moritz

Hennemann, Patricia Bosche, Klaus Wiedemann, 2025-08-02 This book contains the proceedings of the conference Comparative Data Law which was held in Munich in December 2023. The increasing relevance of data is now recognized all over the world. The large number of regulatory acts and proposals in the field of data law serves as a testament to the significance of data processing for the economies of the world. The European Union's Data Strategy, the African Union's Data Policy Framework and the Australian Data Strategy only serve as examples within a plethora of regulatory actions. Yet the purposeful and sensible use of data does not only play a role in economic terms, e.g. regarding the welfare or competitiveness of economies. The implications for society and the common good are at least equally relevant. For instance, data processing is an integral part of modern research methodology and can thus help to address the problems the world is facing today, such as climate change. The conference was the third and final event of the Global Data Law Conference Series. Legal scholars from all over the world met, presented and exchanged their experiences on different data-related regulatory approaches. Various instruments and approaches to the regulation of data, personal or non-personal, were discussed without losing sight of the global effects going hand in hand with different kinds of regulation. In compiling the conference proceedings, this book does not only aim at providing a critical and analytical assessment of the status quo of data law in different countries today; it also aims at providing a forward-looking perspective on the pressing issues of our time, such as: How to promote sensible data sharing and purposeful data governance. Under which circumstances, if ever, do data localisation requirements make sense? How and by whom should international regulation be put in place? The proceedings engage in a discussion on future-oriented ideas and actions, thereby promoting a constructive and sensible approach to data law around the world.
