Federal Trade Commission, 1982 The Genome War James Shreeve, 2007-12-18 The long awaited story of the science the business the politics the intrigue behind the scenes of the most ferocious competition in the history of modern science the race to map the human genome On May 10 1998 biologist Craig Venter director of the Institute for Genomic Research announced that he was forming a private company that within three years would unravel the complete genetic code of human life seven years before the projected finish of the U.S. government's Human Genome Project Venter hoped that by decoding the genome ahead of schedule he would speed up the pace of biomedical research and save the lives of thousands of people He also hoped to become very famous and very rich Calling his company Celera from the Latin for speed he assembled a small group of scientists in an empty building in Rockville Maryland and set to work At the same time the leaders of the government program under the direction of Francis Collins head of the National Human Genome Research Institute at the National Institutes of Health began to mobilize an unexpectedly unified effort to beat Venter to the prize knowledge that had the potential to revolutionize medicine and society The stage was set for one of the most thrilling and important dramas in the history of science The Genome War is the definitive account of that drama the race for the greatest prize biology has had to offer told by a writer with exclusive access to Venter's operation from start to finish It is also the story of how one man's ambition created a scientific Camelot where for a moment it seemed

that the competing interests of pure science and commercial profit might be gloriously reconciled and the national repercussions that resulted when that dream went awry

The Digital Future of English Simone Murray, 2025-07-18 More than any other academic discipline literary studies is the creation of print culture How then can it thrive in the digital era Early 1990s predictions of the book's imminent demise presented a simplistic either/or choice between the legacy of moribund print and triumphalist digital technology Yet we have grown to experience the two media as complexly interdependent and even complementary Clearly digital does not kill print But literary studies in the digital era cannot simply resume business as usual It is urgently necessary to reconsider the discipline's founding assumptions in light of digital technology The digital era prompts a rethinking of literary studies' object of study as well as its methods theories audiences and pedagogical practices What counts as literature necessarily shifts in an age of proliferating born-digital texts and do-it-yourself DIY online publication Where should literary studies sit institutionally and how might it graft contextually oriented social sciences methods onto its traditionally humanistic mode of textual analysis Why should literary study continue to marginalize emotional responses to texts when online communities bond via readerly affect Who is the audience for literary criticism in an age where expertise is routinely challenged yet communication with global book-loving publics has never been technologically easier Finally how can we utilize digital tools to rejuvenate literary studies pedagogy and help English staff better connect with millennial age students Literary studies has been convulsed for decades by debates over electronic literature and more recently digitally aided distant reading But these discussions still mostly confine themselves to demarcating our proper object of study We need to think more expansively about digital technology's impact on the underpinning tenets of the discipline

Literary Media Studies is pitched at fellow literary scholars book historians media

theorists cultural sociologists digital humanists and those working at the interface of these converging disciplines It models constructive engagement with contemporary digital culture Most importantly it brings a burst of sorely needed optimism to the question of literary studies digital future “Black Friday.
