S. Hamrah, 2025-11-25 An almanac of every bad thing that happened in the film industry from March 2024 to March 2025 From A S Hamrah the film critic at n 1 and the author of The Earth Dies Streaming Film Writing 2002 2018 comes this unique archive of unfortunate movie bulletins compiled for his weekly newsletter Last Week in End Times Cinema and presented here in digest form These customized batches of misfortune and upheaval record a full year of wrong thinking bad decisions and man-made disasters from the world of

filmmaking Set against the backdrop of the crazed push for AI the wildfires in Los Angeles and the reelection of Donald Trump the general disaster of current commercial cinema in the age of streaming platforms theater closures and the dead end reliance on IP franchising becomes apparent As the Hollywood film industry plunged into near irrelevance these weekly roundups tracked every passing mistake every easily avoided blunder every up to the minute example of unnecessary garbage as it emerged from the content mills of our newly tech based movie business Presented without commentary footnotes or links inspired by Felix Fennel's Novels in Three Lines and the Coffee News this compilation lists film/land items in naked form stripped of any ameliorating showbiz happy talk As Fred Allen once wrote about Hollywood beneath all that phony tinsel there is real tinsel Here it is all the shiny nothingness of an industry gone astray

Research and Development in Intelligent Systems XXIX Max Bramer, Miltos Petridis, 2012-10-30 The papers in this volume are the refereed papers presented at AI 2012 the Thirty second SGAI International Conference on Innovative Techniques and Applications of Artificial Intelligence held in Cambridge in December 2012 in both the technical and the application streams They present new and innovative developments and applications divided into technical stream sections on Data Mining Data Mining and Machine Learning Planning and Optimisation and Knowledge Management and Prediction followed by application stream sections on Language and Classification Recommendation Practical Applications and Systems and Data Mining and Machine Learning The volume also includes the text of short papers presented as posters at the conference This is the twenty ninth volume in the Research and Development in Intelligent Systems series which also incorporates the twentieth volume in the Applications and Innovations in Intelligent Systems series These series are essential reading for those who wish to keep up to date with developments in this important field

Mastering Machine Learning with Spark 2.x Alex Tellez, Max Pumperla, Michal Malohlava, 2017-08-31 Unlock the complexities of machine learning algorithms in Spark to generate useful data insights through this data analysis tutorial About This Book Process and analyze big data in a distributed and scalable way Write sophisticated Spark pipelines that incorporate elaborate extraction Build and use regression models to predict flight delays Who This Book Is For Are you a developer with a background in machine learning and statistics who is feeling limited by the current slow and small data machine learning tools Then this is the book for you In this book you will create scalable machine learning applications to power a modern data driven business using Spark We assume that you already know the machine learning concepts and algorithms and have Spark up and running whether on a cluster or locally and have a basic knowledge of the various libraries contained in Spark What You Will Learn Use Spark streams to cluster tweets online Run the PageRank algorithm to compute user influence Perform complex manipulation of DataFrames using Spark Define Spark pipelines to compose individual data transformations Utilize generated models for off line on line prediction Transfer the learning from an ensemble to a simpler Neural Network Understand basic graph properties and important graph operations Use GraphFrames an extension of DataFrames to graphs to study graphs using an elegant query language Use K means

algorithm to cluster movie reviews dataset In Detail The purpose of machine learning is to build systems that learn from data Being able to understand trends and patterns in complex data is critical to success it is one of the key strategies to unlock growth in the challenging contemporary marketplace today With the meteoric rise of machine learning developers are now keen on finding out how can they make their Spark applications smarter This book gives you access to transform data into actionable knowledge The book commences by defining machine learning primitives by the MLlib and H2O libraries You will learn how to use Binary classification to detect the Higgs Boson particle in the huge amount of data produced by CERN particle collider and classify daily health activities using ensemble Methods for Multi Class Classification Next you will solve a typical regression problem involving flight delay predictions and write sophisticated Spark pipelines You will analyze Twitter data with help of the doc2vec algorithm and K means clustering Finally you will build different pattern mining models using MLlib perform complex manipulation of DataFrames using Spark and Spark SQL and deploy your app in a Spark streaming environment Style and approach This book takes a practical approach to help you get to grips with using Spark for analytics and to implement machine learning algorithms We ll teach you about advanced applications of machine learning through illustrative examples These examples will equip you to harness the potential of machine learning through Spark in a variety of enterprise grade systems

Innovations in Green and Energy-Efficient Warehousing Frikha, Mohamed Amine,Rahmouni, Mohieddine,Soufiane, Ben Othman,2025-11-13 As global industries face pressure to reduce their environmental footprint warehousing undergoes a shift toward sustainability Innovations in green and energy efficient warehousing reduce operational costs while aligning logistics with environmental goals From the integration of renewable energy sources to the adoption of smart energy management systems and sustainable building materials warehouses become smarter and greener Advanced automation LED lighting and high efficiency HVAC systems optimize energy usage while layout redesigns and electric vehicles minimize emissions across the supply chain These strategies may redefine modern warehousing making it critical to achieving sustainable logistics and a low carbon future Innovations in Green and Energy Efficient Warehousing explores how businesses can integrate sustainability into their warehousing operations It delves into the latest innovations strategies and best practices in sustainable logistics offering theoretical frameworks practical tools and real world case studies to address challenges like cost barriers technological limitations and regulatory compliance This book covers topics such as cost analysis inventory management and predictive modeling and is a useful resource for business owners engineers academicians researchers and scientists

Multiple Information Source Bayesian Optimization Antonio Candeliери,Andrea Ponti,Francesco Archetti,2025-10-01 The book provides a comprehensive review of multiple information sources and multi fidelity Bayesian optimization specifically focusing on the novel Augmented Gaussian Process methodology The book is important to clarify the relations and the important differences in using multi fidelity or multiple information source approaches for solving real world problems Choosing the most appropriate strategy depending on the

specific problem features ensures the success of the final solution The book also offers an overview of available software tools in particular it presents two implementations of the Augmented Gaussian Process based Multiple Information Source Bayesian Optimization one in Python and available as a development branch in BoTorch and finally a comparative analysis against other available multi fidelity and multiple information sources optimization tools is presented considering both test problems and real world applications The book will be useful to two main audiences 1 PhD candidates in Computer Science Artificial Intelligence Machine Learning and Optimization 2 Researchers from academia and industry who want to implement effective and efficient procedures for designing experiments and optimizing computationally expensive experiments in domains like engineering design material science and biotechnology

AI Frameworks and Tools for Software

Development Patel, Rahul K.,2025-04-29 The rapid advancements in artificial intelligence AI are transforming how organizations approach software development creating both opportunities and challenges in the workplace As AI tools become more mainstream understanding their role as well as the responsibilities of users is crucial for ensuring their effective integration into software development processes A clear framework for introducing AI in Information Systems Management can significantly enhance the efficiency and effectiveness of development teams and their external stakeholders AI Frameworks and Tools for Software Development presents the best practices research findings and guidelines for using AI frameworks and tools in software development It provides a holistic understanding of these key processes functions and workflows that are essential for effective Software Development Lifecycle SDLC Covering topics such as industrial automation knowledge management and code reusability this book is an excellent resource for software developers computer scientists professionals researchers scholars academicians and more
