Mobile Web Information Systems Florian Daniel, George A. Papadopoulos, Philippe Thiran, 2013-07-29 This book constitutes the refereed proceedings of the 10 th International Conference on Mobile Web Information Systems MobiWIS 2013 held in Paphos Cyprus in August 2013 The 25 papers 20 full research papers 4 demonstration papers and one abstract of the keynote speech presented were carefully reviewed and selected from various submissions The papers cover the following topics related to mobile Web and Information Systems WISs such as mobile Web services location awareness design and development social computing and society development infrastructures and services SOA and trust UI migration and human factors and Web of Things and networks *Programming in Parallel with CUDA* Richard Ansorge, 2022-06-02 A handy guide to speeding up scientific calculations with real world examples including simulation image processing and image registration [GPU Computing Gems Jade Edition](#) , 2011-11-02 GPU Computing Gems Jade Edition offers hands on proven techniques for general purpose GPU programming based on the successful application experiences of leading researchers and developers One of few resources available that distills the best practices of the community of CUDA programmers this second edition contains 100% new material of interest across industry including finance medicine imaging engineering gaming environmental science and green computing It covers new tools and frameworks for productive GPU computing application development and provides immediate benefit to researchers developing improved programming environments for GPUs Divided into five sections this book explains how GPU execution is achieved with algorithm implementation techniques and approaches to data structure layout More specifically it considers three general requirements high level of parallelism coherent memory access by threads within warps and coherent control flow within warps Chapters explore topics such as accelerating database searches how to leverage the Fermi GPU architecture to further accelerate prefix operations and GPU implementation of hash tables There are also discussions on the state of GPU computing in interactive physics and artificial intelligence programming tools and techniques for GPU computing and the edge and node parallelism approach for computing graph centrality metrics In addition the book proposes an alternative approach that balances computation regardless of node degree variance Software engineers programmers hardware engineers and advanced students will find this book extremely usefull For useful source codes discussed throughout the book the editors invite readers to the following website This second volume of GPU Computing Gems offers 100% new material of interest across industry including finance medicine imaging engineering gaming environmental science green computing and more Covers new tools and frameworks for productive GPU computing application development and offers immediate benefit to researchers developing improved programming environments for GPUs Even more hands on proven techniques demonstrating how general purpose GPU computing is changing scientific research Distills the best practices of the community of CUDA programmers each chapter provides insights and ideas as well as hands on skills applicable to a variety of fields **Massively Parallel Evolutionary**

Computation on GPGPUs Shigeyoshi Tsutsui, Pierre Collet, 2013-12-05 Evolutionary algorithms EAs are metaheuristics that learn from natural collective behavior and are applied to solve optimization problems in domains such as scheduling engineering bioinformatics and finance Such applications demand acceptable solutions with high speed execution using finite computational resources Therefore there have been many attempts to develop platforms for running parallel EAs using multicore machines massively parallel cluster machines or grid computing environments Recent advances in general purpose computing on graphics processing units GPGPU have opened up this possibility for parallel EAs and this is the first book dedicated to this exciting development The three chapters of Part I are tutorials representing a comprehensive introduction to the approach explaining the characteristics of the hardware used and presenting a representative project to develop a platform for automatic parallelization of evolutionary computing EC on GPGPUs The 10 chapters in Part II focus on how to consider key EC approaches in the light of this advanced computational technique in particular addressing generic local search tabu search genetic algorithms differential evolution swarm optimization ant colony optimization systolic genetic search genetic programming and multiobjective optimization The 6 chapters in Part III present successful results from real world problems in data mining bioinformatics drug discovery crystallography artificial chemistries and sudoku Although the parallelism of EAs is suited to the single instruction multiple data SIMD based GPU there are many issues to be resolved in design and implementation and a key feature of the contributions is the practical engineering advice offered This book will be of value to researchers practitioners and graduate students in the areas of evolutionary computation and scientific computing

Computational Modelling and Imaging for SARS-CoV-2 and COVID-19 S. Prabha, P. Karthikeyan, K. Kamalanand, N. Selvaganesan, 2021-09-02 The aim of this book is to present new computational techniques and methodologies for the analysis of the clinical epidemiological and public health aspects of SARS CoV 2 and COVID 19 pandemic The book presents the use of soft computing techniques such as machine learning algorithms for analysis of the epidemiological aspects of the SARS CoV 2 This book clearly explains novel computational image processing algorithms for the detection of COVID 19 lesions in lung CT and X ray images It explores various computational methods for computerized analysis of the SARS CoV 2 infection including severity assessment The book provides a detailed description of the algorithms which can potentially aid in mass screening of SARS CoV 2 infected cases Finally the book also explains the conventional epidemiological models and machine learning techniques for the prediction of the course of the COVID 19 epidemic It also provides real life examples through case studies The book is intended for biomedical engineers mathematicians postgraduate students researchers medical scientists working on identifying and tracking infectious diseases

Iaeng Transactions On Electrical Engineering Volume 1 - Special Issue Of The International Multiconference Of Engineers And Computer Scientists 2012 Sio-iong Ao, Alan Hoi-shou Chan, Hideki Katagiri, Li Xu, 2012-11-19 This volume contains revised and extended research articles written by prominent researchers Topics covered include electrical engineering circuits artificial intelligence data mining imaging

engineering bioinformatics internet computing software engineering and industrial applications The book offers tremendous state of the art advances in electrical engineering and also serves as an excellent reference work for researchers and graduate students working with on electrical engineering **Iaeng Transactions on Electrical Engineering** Sio-Iong Ao,2013 This volume contains revised and extended research articles written by prominent researchers Topics covered include electrical engineering circuits artificial intelligence data mining imaging engineering bioinformatics internet computing software engineering and industrial applications The book offers tremendous state of the art advances in electrical engineering and also serves as an excellent reference work for researchers and graduate students working with on electrical engineering *Implementation and Application of Functional Languages* Sven-Bodo Scholz,Olaf Chitil,2011-09-19 This book constitutes the thoroughly refereed post proceedings of the 20th International Workshop on Implementation and Applications of Functional Languages IFL 2008 held in Hatfield UK in September 2008 The 15 revised full papers presented were carefully reviewed and selected from 31 submissions Topics of interest cover a wide range from novel language designs theoretical underpinnings compilation and optimisation techniques for diverse hardware architectures to applications programming techniques and novel tools *The History of the GPU - New Developments* Jon Peddie,2023-01-01 This third book in the three part series on the History of the GPU covers the second to sixth eras of the GPU which can be found in anything that has a display or screen The GPU is now part of supercomputers PCs Smartphones and tablets wearables game consoles and handhelds TVs and every type of vehicle including boats and planes In the early 2000s the number of GPU suppliers consolidated to three whereas now the number has expanded to almost 20 In 2022 the GPU market was worth over 250 billion with over 2.2 billion GPUs being sold just in PCs and more than 10 billion in smartphones Understanding the power and history of these devices is not only a fascinating tale but one that will aid your understanding of some of the developments in consumer electronics computers new automobiles and your fitness watch **Computer Organization and Design MIPS Edition** David A. Patterson,John L. Hennessy,2020-11-24 Computer Organization and Design The Hardware Software Interface Sixth Edition the leading award winning textbook from Patterson and Hennessy used by more than 40 000 students per year continues to present the most comprehensive and readable introduction to this core computer science topic Improvements to this new release include new sections in each chapter on Domain Specific Architectures DSA and updates on all real world examples that keep it fresh and relevant for a new generation of students Covers parallelism in depth with examples and content highlighting parallel hardware and software topics Includes new sections in each chapter on Domain Specific Architectures DSA Discusses and highlights the Eight Great Ideas of computer architecture including Performance via Parallelism Performance via Pipelining Performance via Prediction Design for Moore's Law Hierarchy of Memories Abstraction to Simplify Design Make the Common Case Fast and Dependability via Redundancy *Heterogeneous Computing Architectures* Olivier Terzo,Karim Djemame,Alberto Scionti,Clara Pezuela,2019-09-10 Heterogeneous Computing

Architectures Challenges and Vision provides an updated vision of the state of the art of heterogeneous computing systems covering all the aspects related to their design from the architecture and programming models to hardware software integration and orchestration to real time and security requirements The transitions from multicore processors GPU computing and Cloud computing are not separate trends but aspects of a single trend mainstream computers from desktop to smartphones are being permanently transformed into heterogeneous supercomputer clusters The reader will get an organic perspective of modern heterogeneous systems and their future evolution *Proceedings of Fourth International Conference on Computing and Communication Networks* Akshi Kumar,Abhishek Swaroop,Pancham Shukla,2025-05-24 This book includes selected peer reviewed papers presented at fourth International Conference on Computing and Communication Networks ICCCN 2024 held at Manchester Metropolitan University UK during 17 18 October 2024 The book covers topics of network and computing technologies artificial intelligence and machine learning security and privacy communication systems cyber physical systems data analytics cyber security for industry 4 0 and smart and sustainable environmental systems **Artificial Intelligence and Mobile Services - AIMS 2020** Ruifeng Xu,Wang De,Wei Zhong,Ling Tian,Yongsheng Bai,Liang-Jie Zhang,2020-09-17 This book constitutes the proceedings of the 9th International Conference on Artificial Intelligence and Mobile Services AIMS 2020 held as part of SCF 2020 during September 18 20 2020 The conference was planned to take place in Honolulu HI USA and was changed to a virtual format due to the COVID 19 pandemic The 11 full and 2 short papers presented were carefully reviewed and selected from 42 submissions They cover topics in AI Modeling AI Analysis AI and Mobile Applications AI Architecture AI Management AI Engineering Mobile backend as a service MBaaS User experience of AI and mobile services **Deep Learning with Python, Third Edition** Francois Chollet,Matthew Watson,2025-09-30 The bestselling book on Python deep learning now covering generative AI Keras 3 PyTorch and JAX Deep Learning with Python Third Edition puts the power of deep learning in your hands This new edition includes the latest Keras and TensorFlow features generative AI models and added coverage of PyTorch and JAX Learn directly from the creator of Keras and step confidently into the world of deep learning with Python In Deep Learning with Python Third Edition you ll discover Deep learning from first principles The latest features of Keras 3 A primer on JAX PyTorch and TensorFlow Image classification and image segmentation Time series forecasting Large Language models Text classification and machine translation Text and image generation build your own GPT and diffusion models Scaling and tuning models With over 100 000 copies sold Deep Learning with Python makes it possible for developers data scientists and machine learning enthusiasts to put deep learning into action In this expanded and updated third edition Keras creator Fran ois Chollet offers insights for both novice and experienced machine learning practitioners You ll master state of the art deep learning tools and techniques from the latest features of Keras 3 to building AI models that can generate text and images About the book Deep Learning with Python Third Edition introduces deep learning from scratch Each chapter introduces practical code examples that build

up your understanding of deep learning layer by layer You'll appreciate the intuitive explanations crisp color illustrations and clear examples In this expanded third edition you'll find fresh chapters on the transformers architecture building your own GPT like large language model and image generation with diffusion models Plus even DL veterans will benefit from the insightful explanations on the nature of deep learning About the reader For readers with intermediate Python skills No previous experience with Keras TensorFlow or machine learning is required About the author Fran ois Chollet is a software engineer at Google and creator of the Keras deep learning library Matthew Watson is a core maintainer of the Keras deep learning library focusing primarily on tools for Natural Language Processing Get a free eBook PDF or ePub from Manning as well as access to the online liveBook format and its AI assistant that will answer your questions in any language when you purchase the print book
