The total of 23 papers included in this book stem from the following workshops: 9th Workshop on Advances in Secure Electronic Voting Schemes Voting 2024 focusing on secure voting protocols has accepted 5 papers out of 13 submissions; 4th Workshop on Decentralized Finance DeFI 2024 focusing on decentralized finance and a blockchain-powered peer-to-peer financial system has received 32 submissions and accepted 4 papers for inclusion in this book; 8th Workshop on Trusted Smart Contracts WTSC 2024 dealing with smart contracts and other decentralised applications accepted 5 papers from 11 submissions; and the 5th Workshop on Coordination of Decentralized Finance CoDecFin 2024 discussing multi-disciplinary issues regarding technologies and operations of decentralized finance based on permissionless blockchain has accepted 8 full and 1 short paper from 15 submissions.

Supercomputing Julian M. Kunkel, Thomas Ludwig, Hans Meuer, 2013-06-12 This book constitutes the refereed proceedings of the 28th International Supercomputing Conference ISC 2013 held in Leipzig, Germany, in June 2013. The 35 revised full papers presented together were carefully reviewed and selected from 89 submissions. The papers cover the following topics: scalable applications with 50K cores; performance improvements in algorithms; accelerators; performance analysis and optimization; library development; administration and management of supercomputers; energy efficiency; parallel I/O; grid and cloud.

GEFORCE GTX 1080 Cyko Games, 2017-05-26 This book is designed to help you understand the NVIDIA GEFORCE GTX 1080 before buying. If you want to buy new GTX 1080 or want to upgrade from GTX 900 series to GTX 1080, I will recommend this book to you to get deep understanding and knowledge about GTX 1080 like Pascal Architecture, Review, Overclocking, Benchmark, Specs, Features, and DX12, etc. Although it's possible to learn about GTX 1080 from internet surfing, but it's a lot easier and faster to use this book. It consolidates everything you need to know in one place. This is the whole main idea of this book. It presents in logical and sequential order that you won't find anywhere else in one place.

Applications, Tools and Techniques on the Road to Exascale Computing Koen de Bosschere, Mark Sawyer, 2012 Single processing units have now reached a point where further major improvements in their performance are restricted by their physical limitations. This is causing a slowing down in advances at the same time as new scientific challenges are demanding exascale speed. This has meant that parallel processing has become key to High Performance Computing (HPC). This book contains the proceedings of the 14th biennial ParCo conference ParCo2011 held in Ghent, Belgium. The ParCo conferences have traditionally concentrated on three main themes: Algorithms, Architectures, and Applications.

Nowadays though the focus has shifted from traditional multiprocessor topologies to heterogeneous and manycores incorporating standard CPUs GPUs Graphics Processing Units and FPGAs Field Programmable Gate Arrays These platforms are at a higher abstraction level integrated in clusters grids and clouds The papers presented here reflect this change of focus New architectures programming tools and techniques are also explored and the need for exascale hardware and software was also discussed in the industrial session of the conference This book will be of interest to all those interested in parallel computing today and progress towards the exascale computing of tomorrow Maximum PC, 2007-02 Maximum PC is the magazine that every computer fanatic PC gamer or content creator must read Each and every issue is packed with punishing product reviews insightful and innovative how to stories and the illuminating technical articles that enthusiasts crave **The Search for ExtraTerrestrial Intelligence** Stelio Montebugnoli, Andrea Melis, Nicolò Antonietti, 2021-03-27 This book presents the latest knowledge of the newly discovered Earth like exoplanets and reviews improvements in both radio and optical SETI A key aim is to stimulate fresh discussion on algorithms that will be of high value in this extremely complicated search Exoplanets resembling Earth could well be able to sustain life and support the evolution of technological civilizations but to date all searches for such life forms have proved fruitless The failings of SETI observations are well recognized and a new search approach is necessary In this book different detection algorithms that exploit state of the art low cost and extremely fast multiprocessors are examined and compared Novel methods such as the agnostic entropy and high sensitivity blind signal extraction algorithms should represent a quantum leap forward in SETI The book is of interest to all researchers in the field and hopefully stimulates significant progress in the search for extraterrestrial intelligence

Proceedings of the 2025 10th International Conference on Financial Innovation and Economic Development (ICFIED 2025) Maizaitulaidawati Md Husin, Tomoki Fujii, Xiaodong Lai, Azlina Binti Md Yassin, 2025-05-02 This is an open access book Financial globalization plays a huge role in promoting the development of the world economy and the optimal allocation of world resources stimulates the accelerated development of the international division of labor and increases the international flow of production factors such as industrial transfer capital transfer and technology transfer It enables developing countries to make up for the lack of their own capital and technology and obtain industrial evolution technological progress and institutional innovation thereby accelerating the speed of economic development it also enables developed countries to open up cheap labor raw material markets and broad consumer markets prolonging product value More profits ease the economy the contradiction of stagflation and restore economic growth At the current stage the overall environment of the international financial market is relatively stable and the market environment has been improved to some extent However due to the complexity and diversity of the world economy coupled with the national characteristics of some countries There is great uncertainty in international policies which has greatly affected the stability of the international financial market In addition the current international environment is changing The conflict between Russia and Ukraine the
