powers are rising ADAM GRANT The world is changing drastically before our eyes will you be prepared for what comes next
A groundbreaking analysis from one of the world s foremost experts on global trends including analysis on how COVID 19
will amplify and accelerate each of these changes Once upon a time the world was neatly divided into prosperous and
backward economies Babies were plentiful workers outnumbered retirees and people aspiring towards the middle class
yearned to own homes and cars Companies didn t need to see any further than Europe and the United States to do well
Printed money was legal tender for all debts public and private We grew up learning how to play the game and we expected
the rules to remain the same as we took our first job started a family saw our children grow up and went into retirement with
our finances secure That world and those rules are over By 2030 a new reality will take hold and before you know it There

will be more grandparents than grandchildren The middle class in Asia and Sub Saharan Africa will outnumber the US and Europe combined The global economy will be driven by the non Western consumer for the first time in modern history There will be more global wealth owned by women than men There will be more robots than workers There will be more computers than human brains There will be more currencies than countries All these trends currently underway will converge in the year 2030 and change everything you know about culture the economy and the world According to Mauro F Guillen the only way to truly understand the global transformations underway and their impacts is to think laterally That is using peripheral vision or approaching problems creatively and from unorthodox points of view Rather than focusing on a single trend climate change or the rise of illiberal regimes for example Guillen encourages us to consider the dynamic inter play between a range of forces that will converge on a single tipping point 2030 that will be for better or worse the point of no return 2030 is both a remarkable guide to the coming changes and an exercise in the power of lateral thinking thereby revolutionizing the way you think about cataclysmic change and its consequences A Day in the Life of a Minimalist Joshua Fields

and Magic in The Witcher Kristine Larsen,2023-02-13 As Andrzej Sapkowski was fleshing out his character Geralt of Rivia for a writing contest he did not set out to write a science textbook or even a work of science fiction However the world that

Sapkowski created in his series The Witcher resulted in a valuable reflection of real world developments in science and technology As the Witcher books have been published across decades the sorcery in the series acts as an extension of the modern science it grows alongside This book explores the fascinating entanglement of science and magic that lies at the heart of Sapkowski s novel series and its widely popular video game and television adaptations This is the first English language book length treatment of magic and science in the Witcher universe These are examined through the lenses of politics religion history and mythology Sapkowski s richly detailed universe investigates the sociology of science and ponders some of the most pressing modern technological issues such as genetic engineering climate change weapons of mass destruction sexism speciesism and environmentalism Chapters explore the unsettling realization that the greatest monsters are frequently human and their heinous acts often involve the unwitting hand of science
