**Meme** Ryan M. Milner, 2018-04-13 How memetic media aggregate texts that are collectively created circulated and transformed become a part of public conversations that shape broader cultural debates Internet memes digital snippets that can make a joke make a point or make a connection are now a lingua franca of online life They are collectively created circulated and transformed by countless users across vast networks Most of us have seen the cat playing the piano Kanye interrupting Kanye interrupting the cat playing the piano In *The World Made Meme* Ryan Milner argues that memes and the memetic process are shaping public conversation It s hard to imagine a major pop cultural or political moment that doesn t generate a constellation of memetic texts Memetic media Milner writes offer participation by reappropriation balancing the familiar and the foreign as new iterations intertwine with established ideas New commentary is crafted by the mediated circulation and transformation of old ideas Through memetic media small strands weave together big conversations Milner considers the formal and social dimensions of memetic media and outlines five basic logics that structure them multimodality reappropriation resonance collectivism and spread He examines how memetic media both empower and exclude during public conversations exploring the potential for public voice despite everyday antagonisms Milner argues that memetic media enable the participation of many voices even in the midst of persistent inequality This new kind of participatory conversation he contends complicates the traditional culture industries When age old gatekeepers intertwine with new ways of sharing information the relationship between collective participation and individual expression becomes ambivalent For better or worse and Milner offers examples of both memetic media have changed the nature of public conversations **Youth Digital Health and Online Platforms** Martyna Gliniecka, 2024-12-27 *Youth Digital Health and Online Platforms* focuses on young people s use of the digital platform Reddit for health Drawing upon dialogism theory the book explores how young people produce a youth led discourse of youth digital health different from the adult led framing represented in youth digital health research policy and service delivery Peer led discussions online remain one of the controversial forms of youth digital health associated with negative peer influence or casual teenage talk This book argues that online peer led dialogues support young

people's agency in health and that young people can benefit from dealing with health issues with peers. The work is based on the digital ethnography of teenagers' subreddits on Reddit and utilises a theoretical framework of dialogism, a linguistic-based theory originated by an early 20th-century Russian philosopher Mikhail Bakhtin. The book introduces the concept of dialogical youth-led youth digital health discourse formed in the peer-led space of Reddit. This youth-led discourse celebrates equality and diversity amongst people, meanings and opinions. It is constructed around three relational elements: socio-material affordances, creative practices, and a plurality of youth voices. Reddit's pseudonymous, anti-authoritarian and egalitarian nature supports the emergence of this youth-led discourse. The book can interest scholars and lecturers in childhood and youth studies, Internet studies and youth health studies. Professionals such as policymakers, service designers, deliverers, online safety educators and global youth and health agencies can use evidence-based insights in their work with young people.

*Equality in progress* Angela Wroblewski, Angelika Schmidt, 2025-09-30. The volume addresses current challenges for gender equality policy and the necessary further development of gender equality policy concepts in order to effectively engage with exclusion mechanisms. The contributions discuss this at the interface between research and policy and on the basis of specific examples.

**Optimizing Play** Christopher A. Paul, 2024-05-14. An unexpected take on how games work, what the stakes are for them, and how game designers can avoid the traps of optimization. The process of optimization in games seems like a good thing: who wouldn't want to find the most efficient way to play and win? As Christopher Paul argues in *Optimizing Play*, however, optimization can sometimes risk a tragedy of the commons, where actions that are good for individuals jeopardize the overall state of the game for everyone else. As he explains, players inadvertently limit play as they theorycraft, seeking optimal choices. The process of developing a meta, or the most effective tactic available, structures decision-making, causing play to stagnate. A stale meta then creates a perception that a game is solved and may lead players to turn away from the game. Drawing on insights from game studies, rhetoric, the history of science, ecology, and game theory literature, Paul explores the problem of optimization in a range of video games, including *Overwatch*, *FIFA*, *EA Sports FC*, *NBA 2K*, *Clash Royale*, *World of Warcraft*, and *League of Legends*. He also pulls extensively from data analytics in sports, where the problem has progressed further and is even more intractable than it is in video games, given the money sports teams invest to find an edge. Finally, Paul offers concrete and specific suggestions for how games can be developed to avoid the trap set by optimization run amok.

*Bullyocracy* Donald Jeffries, 2020-01-03. Bestselling author Donald Jeffries turns his critical eye onto the topic of bullying to show how teachers, principals, and other school officials invariably side with the bullies in the most egregious cases instead of protecting the victims. He also shows how many so-called anti-bullying activists and nearly all the professional experts

excuse bullying and in fact laud sociopathic behavior in general As Jeffries demonstrates this curious phenomenon is due to the power and influence of the social hierarchy and it revolves to a great extent around the enduring popularity of sports Jeffries talked to parents who d battled a system that logically should have been working for them some of whom lost a child to bullycide the term for children who kill themselves over bullying His investigation into what has become one of the most talked about issues in America is as explosive and controversial as anything he has written **Organizational**
