Resume Template Stagram Picks Usa:

Instagram Tama Leaver, Tim Highfield, Crystal Abidin, 2020-01-22 Instagram is at the heart of global digital culture having made selfies filters and square frames an inescapable part of everyday life since it was launched in 2010 In the first book length examination of Instagram Tama Leaver Tim Highfield and Crystal Abidin trace how this quintessential mobile photography app has developed as a platform and a culture They consider aspects such as the new visual social media aesthetics the rise of Influencers and new visual economies and the complex politics of the platform as well as examining how Instagram s users change their use of the platform over time and respond to evolving features The book highlights the different ways Instagram is used by subcultural groups around the world and how museums restaurants and public spaces are striving to be Insta worthy Far from just capturing milestones and moments the authors argue that Instagram has altered the ways people communicate and share while also creating new approaches to marketing advertising politics and the design of spaces and venues Rich with grounded examples from across the world from birth pictures to selfies at funerals Instagram is essential reading for students and scholars of media and communication Social Computing and Social Media. Design, Human Behavior and Analytics Gabriele Meiselwitz, 2019-07-10 This two volume set LNCS 11578 and 11579 constitutes the refereed proceedings of the 11th International Conference on Social Computing and Social Media SCSM 2019 held in July 2019 as part of HCI International 2019 in Orlando FL USA HCII 2019 received a total of 5029 submissions of which 1275 papers and 209 posters were accepted for publication after a careful reviewing process The 81 papers presented in these two volumes are organized in topical sections named Social Media Design and Development Human Behaviour in Social Media Social Network Analysis Community Engagement and Social Participation Computer Mediated Communication Healthcare Communities Social Media in Education Digital Marketing and Consumer Experience Social Media and the Armed Forces Eva Moehlecke de Baseggio, Olivia Schneider, Tibor Szvircsev Tresch, 2020-09-07 Social media has fundamentally changed communication and interaction in today s society Apart from being used by individuals it is also omnipresent in public sector organisations such as the armed forces This book examines the opportunities and risks associated with social media in the context of the armed forces from an international social scientific perspective It discusses the impact of social media in the everyday life of military personnel and analyses the extent to which social media influences their performance be it as a distraction or as a source of perceived appreciation It particularly highlights the representation of masculinity and femininity in military social media channels since the way gender is portrayed on social media has an effect on how future recruits and at the other end of the military career spectrum veterans feel they are approached The book also focuses on the new form of follow up discussion which enables the armed forces to interact with the population On social media the armed forces are publicly presented and this shapes the public s opinions on them Further the armed forces can use debates as a monitoring tool of society s attitudes towards them or towards events that have an effect on society Conversely social media can lend a

voice to military personnel allowing them to be publicly heard As discussions on social media can only be controlled to a limited extent the context in which the armed forces are discussed alters their sphere of influence and potentially leads to a loss of control An extreme example of this is the use of social media as a tool to strategically distribute misinformation in order to shape public opinion and threaten national security Moreover the use of social media to demoralise adversaries or to harm their credibility results in social media being considered a cyber weapon that affects politics and military activities
