Romantasy S Deal:

Romance for Sale in Early Modern England Steve Mentz, 2017-09-29 The major claim made by this study is that early modern English prose fiction self consciously invented a new form of literary culture in which professional writers created books to be printed and sold to anonymous readers It further claims that this period s narrative innovations emerged not solely from changes in early modern culture like print and the book market but also from the rediscovery of a forgotten late classical text from North Africa Heliodorus s Aethiopian History In making these claims Steve Mentz provides a comprehensive historicist and formalist account of prose romance the most important genre of Elizabethan fiction He explores how authors and publishers of prose fiction in late sixteenth century England produced books that combined traditional narrative forms with a dynamic new understanding of the relationship between text and audience Though prose fiction would not dominate English literary culture until the eighteenth century Mentz demonstrates that the form began to invent itself as a distinct literary kind in England nearly two centuries earlier Examining the divergent but interlocking careers of Robert Greene Sir Philip Sidney Thomas Lodge and Thomas Nashe Mentz traces how through differing commitments to print culture and their respective engagements with Heliodoran romance these authors helped make the genre of prose fiction culturally and economically viable in England Mentz explores how the advent of print and the book market changed literary discourse influencing new conceptions of what he calls middlebrow narrative and new habits of reading and writing This study draws together three important strains of current scholarly inquiry the history of the book and print culture the study of popular fiction and the re examination of genre and influence It also connects early modern fiction with longer histories of prose fiction and the rise of the modern novel
