*Magnetospheric Plasma Physics: The Impact of Jim Dungey's Research* David Southwood,Stanley W. H. Cowley  
FRS,Simon Mitton,2015-08-20 This book makes good background reading for much of modern magnetospheric physics Its origin was a Festspiel for Professor Jim Dungey former professor in the Physics Department at Imperial College on the occasion of his 90th birthday 30 January 2013 Remarkably although he retired 30 years ago his pioneering and often maverick work in the 50 s through to the 70 s on solar terrestrial physics is probably more widely appreciated today than when he retired Dungey was a theoretical plasma physicist The book covers how his reconnection model of the magnetosphere evolved to become the standard model of solar terrestrial coupling Dungey s open magnetosphere model now underpins a holistic picture explaining not only the magnetic and plasma structure of the magnetosphere but also its dynamics which can be monitored in real time The book also shows how modern day simulation of solar terrestrial coupling can reproduce the real time evolution of the solar terrestrial system in ways undreamt of in 1961 when Dungey s epoch making paper was published Further contributions on current Earth magnetosphere research and space plasma physics included in this book show how Dungey s basic ideas have remained explanative 50 years on But the Festspiel also introduced some advances that possibly Dungey had not foreseen One of the contributions presented in this book is on the variety of magnetospheres of the solar system which have been seen directly during the space age discussing the variations in spatial scale and reconnection time scale and comparing them in respect of Earth Mercury the giant planets as well as Ganymede      *Apple Computing for Seniors in easy steps* Nick Vandome,2015-02-25 Apple Computing for Seniors in easy steps shows how to put the fun back into your computing experiences even Seniors can now enjoy the sleek and stylish world of Apple computing Presented in larger type for easier reading Computing is no longer a standalone activity on a single device and Apple has created a range of products to help with all of your computing needs whether you are using a Mac computer an iPhone an iPad or an iPod Touch or a combination of all three Apple s products are not created in isolation the aim is to create a seamless experience whether using a Mac computer an iPhone or an iPad and ensure that content from one device can easily be accessed and opened on another device This is done largely through the online iCloud service which can be used to store and backup content from Apple devices and then make this content available to other compatible Apple devices This is done with a unique Apple ID and can be used to view items such as photos documents calendars address
