Music and Youth Culture in Latin America Pablo Vila,2014

Music is one of the most distinctive cultural characteristics of Latin American countries But while many people in the United States and Europe are familiar with musical genres such as salsa merengue and reggaeton the musical manifestations that young people listen to in most Latin American countries are much more varied than these commercially successful ones that have entered the American and European markets Not only that the young people themselves often have little in common with the stereotypical image of them that exists in the American imagination Bridging this divide between perception and reality Music and Youth Culture in Latin America brings together contributors from throughout Latin America and the US to examine the ways in which music is used to advance identity claims in several Latin American countries and among Latinos in the US From young Latin American musicians who want to participate in the vibrant jazz scene of New York without losing their cultural roots to Peruvian rockers who sing in their native language Quechua for the same reasons to the young Cubans who use music to construct a post communist social identification this volume sheds new light on the complex ways in which music provides people from different countries and social sectors with both enjoyment and tools for understanding who they are in terms of nationality region race ethnicity class gender and migration status Drawing on a vast array of fields including popular music studies ethnomusicology sociology and history Music and Youth Culture in Latin America is an illuminating read for anyone interested in Latin American music culture and society
