Pharmaceutical Prices in the 21st Century Zaheer-Ud-Din Babar, 2014-12-05 This book provides an overview of the global pharmaceutical pricing policies Medicines use is increasing globally with the increase in resistant microbes emergence of new treatments and because of awareness among consumers This has resulted in increased drug expenditures globally As the pharmaceutical market is expanding a variety of pharmaceutical pricing strategies and policies have been employed by drug companies state organizations and pharmaceutical pricing authorities *Forecasting Models of Electricity Prices* Javier Contreras, 2018-04-06 This book is a printed edition of the Special Issue Forecasting Models of Electricity Prices that was published in Energies **Excessive Pricing and Competition Law Enforcement** Yannis Katsoulacos, Frédéric Jenny, 2018-09-12 This volume examines the controversy surrounding the use of competition law to combat excessive pricing While high or monopolistic pricing is not regarded as an antitrust violation in the US employing abuse of dominance provisions in competition laws to fight excessive pricing has gained popularity in some BRICS jurisdictions and a number of EU member states in recent years The book begins by discussing the economic arguments for and against the prohibition of excessive or unfair prices by firms with market power It then presents various country studies focusing on developed countries such as the UK and Israel and on the BRICS countries to highlight various practical challenges involved in recognizing excessive prices as abusive conduct on the part of dominant firms including how to define measure and identify excessive prices The contributors also discuss other policy options that can be used to fight excessive prices in order to protect consumer welfare **Innovation in Pricing** Andreas Hinterhuber, Stephan M. Liozu, 2017-08-08 Pricing has a substantial and immediate impact on profitability Most companies however still use costs or competition as their main basis for setting prices Product or business model innovation has a high priority for many companies yet innovation in pricing received scant attention until the first edition of this groundbreaking book This new edition of Innovation in Pricing builds on the success of the first examining the ways in which pricing innovation can drive profits through cutting edge academic research and best practice case studies from leading academics business practitioners and consultants in pricing The second edition has been fully revised and updated according to the latest developments in pricing with revisions to all chapters new chapters including a chapter on business model and pricing model innovation a new introduction that makes explicit just what strategic pricing can do for your organization This book is the only book dedicated to innovation in pricing and is an essential read for business executives innovation managers and pricing managers wishing to treat innovation in pricing as seriously as they treat product service or business model innovation It is also valuable supplementary reading for advanced students of marketing and sales *Food Prices and Rural Poverty* Centre for Economic Policy Research, 2010-10 The link between food prices and poverty is as complex as it is important Aksoy and Hoekman have put together a book that significantly advances our knowledge of this link The book not only explores the conditions under

which the poor are affected by food price movements but includes a number of empirical studies on the price poverty link in specific developing countries It deserves careful study by governments and NGOs Tim Josling Professor Emeritus Food Research Institute and Senior Fellow Freeman Spogli Institute for International Studies Stanford University The timing of this book could hardly have been more appropriate while the international community still ponders on the poverty implications of the 2007-8 global food crisis food prices are on the rise again and create nervousness Governments are being called upon to protect the poor against high food prices But we know too little about the actual relationship between food prices and poverty This book provides us with new insights into this critical link and goes far beyond the simplistic views that have prevailed so far Policy makers concerned about food prices and poverty should study it carefully Stefan Tangermann Professor Emeritus Department of Agricultural Economics and Rural Development University of Göttingen former OECD Director for Trade and Agriculture The spike in international food prices in 2008 was a reminder to the world of how vital food prices are for those billion or more people near or below the extreme poverty line Most of those poor people live in rural areas but many are net buyers rather than net sellers of food Even so they may benefit indirectly through higher wages when the farm price of food rises The only way to identify which groups are at risk is through careful empirical studies at the household level for each country This volume brings together a rich collection of such studies By covering rural areas of Africa Asia and Latin America it offers a range of insights for policy makers who too often focus only on the more visible urban poor Kym Anderson George Gollin Professor of Economics University of Adelaide

Contemporary Issues in Business and

Economics Chia-Lin Chang, Duc Hong Vo, 2020-07-01 This book is a collection of high impact papers accepted and presented at the 2019 Vietnam's Business and Economics Research Conference VBER2019 organised by Ho Chi Minh City Open University held on 18th-20th July 2019. The Special Issue is associated with a broad coverage of the contemporary issues in Business and Economics in Vietnam and other emerging markets reflecting a key theme of VBER2019 Vietnam's Place in the Asia Pacific Region. A total of 14 papers were published from more than the 120 submissions to the VBER2019 Conference. Published papers had been undergone a rigorous reviewing process conducted by the Journal of Risk and Financial Management. The papers incorporated in this book address contemporary issues in business and economics from Vietnam and other emerging markets in the Asian region from various angles such as economics, finance and statistics to management science. At the time of writing this note, some of the papers have attracted more than 1000 downloads in 3 months. In particular, a paper on Foreign Direct Investment and Economic Growth from Developing Countries in the Short Run and Long Run by Trang Thi Huyen Dinh and her team has attracted almost 6000 downloads in 3 months. These statistics indicate that the papers published in this Special Issue have attracted the wide interest of readers. Among these 14 published papers, three main areas of important contemporary issues in Business and Economics in the Asian region can be identified. First, a block of papers deals with various important and fundamental issues in the emerging markets of the Asian region from exchange rate regime, financial inclusion and financial development to energy consumption and environmental degradation. On the issue of CO₂ emissions, energy consumption and economic growth in the ASEAN, Vo and Le utilized various time series econometrics approaches. Key findings from this paper indicate that there are no long run relationships among carbon dioxide, CO₂ emissions, energy consumption, renewable energy, population growth and economic growth in the Philippines and Thailand, but a relationship does exist in Indonesia, Myanmar and Malaysia. Loo, in his paper on financial inclusion for the ASEAN, concluded that advancing internet capability and availability presents investors an opportunity to offer financial technology or Fintech to meet the need for financial services in this digital era. Second, a challenge in quantitative studies for a single country such as Vietnam with limited data is generally noted. However, various empirical studies on Vietnam's business and economics issues have been conducted. Nguyen Quan and Pham examined the cultural distance and entry mode of foreign direct investment in Vietnam. A key finding from their paper is that when there is a great cultural difference between Vietnam and their home country, foreign invested firms prefer wholly owned subsidiaries over equity joint ventures. Within the Vietnamese market, Pham, Vo, Ho and McAleer conducted a study on the issue of corporate financial distress. The authors conclude that the corporate financial distress prediction model which includes accounting factors with macroeconomic indicators performs much better than alternative models. In addition, the evidence confirms that the global financial crisis GFC had a damaging impact on each sector, with the Health Education sector demonstrating the most

impressive recovery post GFC and the utilities sector recording a dramatic increase in bankruptcies post GFC. At another extreme of the spectrum Van and Nguyen considered that competitive context, social influences, the understanding of managers about corporate social responsibility (CSR) and the internal environment of companies are the four drivers of CSR. The authors also argued that in the four drivers, competitive context has the strongest impact on adopting CSR. Third last but not least, various papers focus on an important aspect of public finance. For an example, Pham Pham and Ly documented the effect of double taxation treaties on the bilateral trade of Vietnam with ASEAN member states, thereby making an extensive comparison with its EU partner countries. Their findings indicate the significant contributions of the tax treaties to Vietnam's trade performance, not exclusively with ASEAN but also with EU partner countries. In addition, regarding public finance for Vietnam, Nguyen Vo Ho and Vo investigated the contribution of fiscal decentralisation to economic growth across provinces in Vietnam. For the first time in Vietnam, the fiscal decentralisation index, together with its two subcomponents including fiscal importance and fiscal autonomy, are developed. Findings from this paper indicate that while fiscal importance and an overall level of fiscal decentralisation have provided a negative impact on provincial economic growth, fiscal autonomy has a positive impact on economic growth across provinces in Vietnam.

Selected Papers from Coastlab18 Conference Javier López Lara, Maria Maza, 2020-07-01. This book presents 16 selected papers from the 7th International Conference on The Application of Physical Modelling in Coastal and Port Engineering and Science (Coastlab18). The conference was organized in Santander, Spain, from 22 to 26 May 2018, by the Instituto de Hidráulica Ambiental de la Universidad de Cantabria (IH Cantabria). Coastlab18 welcomed 175 attendees from 18 different countries. The technical program included three renowned keynote lectures and 120 presentations focused on theoretical and practical aspects related to physical modelling in the field of coastal and ocean engineering. Coastal and ocean structures, breakwaters, revetments, laboratory technologies, measurement systems, coastal field measurement and monitoring, combined physical and numerical modelling, physical modelling case studies, tsunamis and coastal hydrodynamics were the main topics covered in the conference. This book attempts to cover as completely as possible all the topics presented during the conference. The papers were accepted after a peer review process based on their full text.
