Recent Advances and the Future Generation of Neuroinformatics

Infrastructure Xi Cheng, Daniel R. Weinberger, Daniel Marcus, John Van Horn, Venkata Satyanand Mattay, Qian Luo, 2015-12-11 The huge volume of multi modal neuroimaging data across different neuroscience communities has posed a daunting challenge to traditional methods of data sharing data archiving data processing and data analysis Neuroinformatics plays a crucial role in creating advanced methodologies and tools for the handling of varied and heterogeneous datasets in order to better understand the structure and function of the brain These tools and methodologies not only enhance data collection analysis integration interpretation modeling and dissemination of data but also promote data sharing and collaboration This Neuroinformatics Research Topic aims to summarize the state of art of the current achievements and explores the directions for the future generation of neuroinformatics infrastructure The publications present solutions for data archiving data processing and workflow data mining and system integration methodologies Some of the systems presented are large in scale geographically distributed and already have a well established user community Some discuss opportunities and methodologies that facilitate large scale parallel data processing tasks under a heterogeneous computational environment We wish to stimulate on going discussions at the level of the neuroinformatics infrastructure including the common challenges new technologies of maximum benefit key features of next generation infrastructure etc We have asked leading research groups from different research areas of neuroscience neuroimaging to provide their thoughts on the development of a state of the art and highly efficient neuroinformatics infrastructure Such discussions will inspire and help guide the development of a state of the art highly efficient neuroinformatics infrastructure

Advances in Human Factors and Simulation Daniel N. Cassenti, 2019-06-01 This book focuses on modeling and simulation research that advances the current

state of the art regarding human factors in this area. It reports on cutting edge simulators such as virtual and augmented reality on multisensory environments and on modeling and simulation methods used in various applications including surgery, military operations, occupational safety, sports training, education, transportation and robotics. Based on the AHFE 2019 International Conference on Human Factors in Simulation and Modeling held on July 24-28, 2019 in Washington D C USA, the book serves as a timely reference guide for researchers and practitioners developing new modeling and simulation tools for analyzing or improving human performance. It also offers a unique resource for modelers seeking insights into human factors research and more feasible and reliable computational tools to foster advances in this exciting research field. *Full Circle Magazine #96* Ronnie Tucker, 2015-04-24.
