Technology has fractured democracy and now there s no going back All around the world the fringes have stormed the palace of the elites and unleashed data miners dark ads and bots on an unwitting public After years of soundbites about connecting people the social media giants are only just beginning to admit to the scale of the problem We stand on the precipice of an era where switching your mobile platform will have more impact on your life than switching your government Where freedom and privacy are seen as incompatible with social well being and transparency Where your attention is sold to the highest bidder Our laws don t cover what is happening and our politicians don t understand it But if we don t fight to change the system now we may not get another chance Reset your brain & Hack your mind. Nico Quindt,2023-09-25 Within you lie all the tools to shape the person you want to become You ve witnessed this a thousand times how when you change reality changes You can t change anyone but yourself and the only person from whom you can expect anything is yourself Nobody will behave as you expect them to Nobody shares your priorities values and principles Nobody dreams your dreams You are or should be the creator of your own consciousness the shaper of your essence the developer of your own ideas With each thought you assemble adding a new piece to the puzzle of your mind Your brain is a vast repository of cells where you store everything that constitutes your essence memories imagination thoughts plans You arrange them according to your priorities

each cell is specifically placed where you chose where you put it for whatever reason Your mind is your responsibility Your mind processes around sixty thousand thoughts per day and 90% of those thoughts are the same as the ones processed yesterday and the day before If you process the same thoughts you ll make the same decisions have the same attitudes which will create the same experiences and those experiences will reflect the same emotions in your mind releasing the same neurotransmitters flooding your body reinforcing those thoughts and embedding them in your nervous system Now you re experiencing these thoughts because you can feel them Those emotions have been confirmed by your mind they intensify and stress you out From that stress new neural circuits will be formed your biology has been altered and now this event has been registered by your body It s not just a fleeting thought but something you ve felt and felt again your mind has confirmed it as true your body has suffered from it You became stressed because of it and went on high alert and in an instant you re in survival mode using up reserves of energy meant for other bodily functions Blood is flowing to your extremities due to your most primitive fight or flight response being activated putting other functions on hold Blood is not flowing to the right organs for them to function correctly causing them to start failing gradually As you maintain these stress levels your organs will deteriorate At this moment there s discomfort your body is not well You don t feel good your motivation is not optimal Your attitude has changed You are not the same and don t feel the same as you did just moments ago Do you see now why you need a mind hack If you continue thinking the same way you ll make the same decisions and get the same outcomes That s why you need a brain reset You need a method a way of thinking differently changing those thoughts hacking your mind rewiring your internal circuits and restructuring your neural channels so your brain works differently Cells that fire together stay connected so if several neurons form a neural circuit due to a style of thought that pattern will be repeated in the same sequence it originated Therefore every time we make our brain work differently we will force it to change its structure form new patterns You are or should be the creator of your own consciousness the shaper of your essence the developer of your own ideas With each thought you assemble adding a new piece to the puzzle of your mind Your brain is a vast repository of cells where you store everything memories imagination thoughts plans You arrange them according to your priorities each cell is specifically placed where you chose where you put it for whatever reason Your mind is your responsibility Old and New ,1870 Old and New Edward Everett Hale,1870 **Oklahoma** Geological Survey (U.S.),1992 **Blueprint** ,2008
