Algorithmic Marketing and EU Law on Unfair Commercial Practices Federico Galli, 2022-08-30 Artificial Intelligence AI systems are increasingly being deployed by marketing entities in connection with consumers interactions Thanks to machine learning ML and cognitive computing technologies businesses can now analyse vast amounts of data on consumers generate new knowledge use it to optimize certain processes and undertake tasks that were previously impossible Against this background this book analyses new algorithmic commercial practices discusses their challenges for consumers and measures such developments against the current EU legislative framework on consumer protection The book adopts an interdisciplinary approach building on empirical findings from AI applications in marketing and theoretical insights from marketing studies and combining them with normative analysis of privacy and consumer protection in the EU The content is divided into three parts The first part analyses the phenomenon of algorithmic marketing practices and reviews the main AI and AI related technologies used in marketing e g Big data ML and NLP The second part describes new commercial practices including the massive monitoring and profiling of consumers the personalization of advertising and offers the exploitation of psychological and emotional insights and the use of human like interfaces to trigger emotional responses The third part provides a comprehensive analysis of current EU consumer protection laws and policies in the field of commercial practices It focuses on two main legal

concepts their shortcomings and potential refinements vulnerability understood as the conceptual benchmark for protecting consumers from unfair algorithmic practices manipulation the substantive legal measure for drawing the line between fair and unfair practices *Electronic Evidence Essentials: Structured Training for Law Enforcement* Capt. Nilesh Tiwari (Retd),2025-08-21 *Electronic Evidence Essentials Structured Training for Law Enforcement* is a practical guide for law enforcement professionals navigating the challenges of digital crime Written by Capt Nilesh Tiwari Retd a veteran in data disclosure and lawful access it offers a step by step approach to managing electronic evidence covering mobile data cloud records and metadata The book integrates legal insights with operational best practices and includes real world examples procedures and checklists It also forms the core of a Certified Training Program available via LEA Training through both website and mobile app designed to equip officers with essential skills in digital investigations and evidence handling *The Role of Technology in Clinical Neuropsychology* Robert L. Kane,Thomas D. Parsons,2017 *Neuropsychology* as a field has been slow to embrace and exploit the potential offered by technology to either make the assessment process more efficient or to develop new capabilities that augment the assessment of cognition *The Role of Technology in Clinical Neuropsychology* details current efforts to use technology to enhance cognitive assessment with an emphasis on developing expanded capabilities for clinical assessment The first sections of the book provide an overview of current approaches to computerized assessment along with newer technologies to assess behavior The next series of chapters explores the use of novel technologies and approaches in cognitive assessment as they relate to developments in telemedicine mobile health and remote monitoring including developing smart environments While still largely office based health care is increasingly moving out of the office with an increased emphasis on connecting patients with providers and providers with other providers remotely Chapters also address the use of technology to enhance cognitive rehabilitation by implementing conceptually based games to teach cognitive strategies and virtual environments to measure outcomes Next the chapters explore the use of virtual reality and scenario based assessment to capture critical aspects of performance not assessed by traditional means and the implementation of neurobiological metrics to enhance patient assessment Chapters also address the use of imaging to better define cognitive skills and assessment methods along with the integration of cognitive assessment with imaging to define the functioning of brain networks The final section of the book discusses the ethical and methodological considerations needed for adopting advanced technologies for neuropsychological assessment Authored by numerous leading figures in the field of neuropsychology this volume emphasizes the critical role that virtual environments neuroimaging and data analytics will play as clinical neuropsychology moves forward in the future *Data Profiling and Insurance Law* Brendan McGurk KC,2019-03-21 The winner of the 2020 British Insurance Law Association Book Prize this timely expertly written book looks at the legal impact that the use of Big Data will have on the provision and substantive law of insurance Insurance companies are set to become some of the biggest consumers of big data which will enable them to

profile prospective individual insureds at an increasingly granular level More particularly the book explores how i insurers gain access to information relevant to assessing risk and or the pricing of premiums ii the impact which that increased information will have on substantive insurance law and in particular duties of good faith disclosure and fair presentation of risk and iii the impact that insurers new knowledge may have on individual and group access to insurance This raises several consequential legal questions i To what extent is the use of big data analytics to profile risk compatible at least in the EU with the General Data Protection Regulation ii Does insurers ability to parse vast quantities of individual data about insureds invert the information asymmetry that has historically existed between insured and insurer such as to breathe life into insurers duty of good faith disclosure And iii by what means might legal challenges be brought against insurers both in relation to the use of big data and the consequences it may have on access to cover Written by a leading expert in the field this book will both stimulate further debate and operate as a reference text for academics and practitioners who are faced with emerging legal problems arising from the increasing opportunities that big data offers to the insurance industry
