The Web and Faith Ayse Kok, 2022-09-01 Computing technology is an indispensable feature of modern life Our rapid paced world seems more and more remote from the world narrated in sacred scriptures However despite its pervasiveness there remains a dearth of theological reflection about computer technology and what it means to live as a faithful individual in a digitally saturated society The Web and Faith provides a brief theology of technology rooted in the Islamic tradition and oriented around the grand themes of creation redemption and new creation The book combines a concise accessible style with penetrating cultural and theological analysis Building on the work of Marshall McLuhan and Neil Postman and drawing from a wide range of enlightened Islamic thinkers the book situates computer technology within the big picture of the story of creation Technology is not neutral but neither is there an exclusively faith based form of technological production and use Instead this book guides us to see the digital world as part of a larger creation which is redeemable according to the law of faith Responsibly used technology can become an integral part of religious wisdom world wide

Deeks, 2025 National security decisions pose a paradox they are among the most consequential a government can make but are generally the least transparent to the democratic public The black box nature of national security decision making driven by extensive classification and characterized by difficulty overseeing executive actions has expanded in the United States as executive power continues to grow The rise of artificial intelligence AI systems to enhance national security decision making or even to make autonomous decisions deepens this challenge because it is difficult to understand how AI algorithms often described as black boxes reach their conclusions The widespread use of AI inside the national security ecosystem renders U S national security choices even more opaque to the public congressional overseers U S allies and even the executive officials making the decisions How can we be confident that the U S government
