Research Anthology on Mental Health Stigma, Education, and Treatment Management Association, Information Resources,2021-02-05 In times of uncertainty and crisis the mental health of individuals become a concern as added stressors and pressures can cause depression anxiety and stress Today especially with more people than ever experiencing these effects due to the Covid 19 epidemic and all that comes along with it discourse around mental health has gained heightened urgency While there have always been stigmas surrounding mental health the continued display of

these biases can add to an already distressing situation for struggling individuals. Despite the experience of mental health issues becoming normalized, it remains important for these issues to be addressed along with adequate education about mental health so that it becomes normalized and discussed in ways that are beneficial for society and those affected. The Research Anthology on Mental Health Stigma: Education and Treatment explores the latest research on the newest advancements in mental health, best practices, and new research on treatment and the need for education and awareness to mitigate the stigma that surrounds discussions on mental health. The chapters will cover new technologies that are impacting delivery modes for treatment, the latest methods and models for treatment options, how education on mental health is delivered and developed, and how mental health is viewed and discussed. It is a comprehensive view of mental health from both a societal and medical standpoint and examines mental health issues in children and adults from all ethnicities and socio-economic backgrounds and in a variety of professions including healthcare, emergency services, and the military. This book is ideal for psychologists, therapists, psychiatrists, counsellors, religious leaders, mental health support agencies, and organizations, medical professionals, teachers, researchers, students, academicians, mental health practitioners, and more.
