Transaction Cost Management Chihiro Suematsu, 2014-08-07 All organizations institutions business processes markets and strategies have one aim in common the reduction of transaction costs This aim is pursued relentlessly in practice and has been perceived to bring about drastic changes especially in the recent global market and the cyber economy This book analyzes and describes transactions as a model on the basis of which organizations institutions and business processes can be appropriately shaped It tracks transaction costs to enable a scientific approach instead of a widely used state of the art approach working to bridge the gap between theory and practice This open access book analyzes and describes transactions as a model

The Profit Paradox Jan Eeckhout, 2022-10-25 A pioneering account of the surging global tide of market power and how it stifles workers around the world In an era of technological progress and easy communication it might seem reasonable to assume that the world's working people have never had it so good But wages are stagnant and prices are rising so that everything from a bottle of beer to a prosthetic hip costs more Economist Jan Eeckhout shows how this is due to a small number of companies exploiting an unbridled rise in market power the ability to set prices higher than they could in a properly functioning competitive marketplace Drawing on his own groundbreaking research and telling the stories of common workers throughout he demonstrates how market power has suffocated the world of work and how without better mechanisms to ensure competition it could lead to disastrous market corrections and political turmoil The Profit Paradox describes how over the past forty years a handful of companies have reaped most of the rewards of technological advancements acquiring rivals securing huge profits and creating brutally unequal outcomes for workers Instead of passing on the benefits of better technologies to consumers through lower prices these superstar companies leverage new technologies to charge even higher prices The consequences are already immense from unnecessarily high prices for virtually everything to fewer startups that can compete to rising inequality and stagnating wages for most workers to severely limited social mobility A provocative investigation into how market power hurts average working people The Profit Paradox also offers concrete solutions for fixing the problem and restoring a healthy economy

Banking, Lending and Real Estate Claudio Scardovi, Alessia Bezzecchi, 2019-05-23 This book deals directly with the risk return multiple trade offs coming out of the closely intertwined relationship between banking and real estate The authors explore how banks could embrace a more proactive approach to make the most of their mostly long only exposure to real estate and create positive spillover effects on their real estate counterparts and the sector as a whole It provides a state of the art representation and analysis of the strategies that best practices in banking are adopting to manage these issues and plan for a new set of interrelations driving a virtuous circle as opposed to the current one Banking Lending and Real Estate is built on the academic knowhow and professional expertise of the authors who have been researching writing and working on this joint topic for over a decade With its pragmatic approach it allows the reader to capture which leading hedge active and holistic

approaches are available today and proven to treat for example the banks overexposure to this asset class to manage unlikely to pay and sub performing positions and to optimize the recovery value coming from the work out of real estate related NPL and underlying assets Case studies and relevant examples are provided leveraging on the authors experience in consulting projects in the EMEA region and from working with global regional and domestic banks and the real estate players acting across its value chain This book will appeal to both academics and business practitioners within the banking financial services and real estate sectors as well as professionals from financial and strategic industrial advisory working in those fields
