Sensehacking Charles Spence, 2021-01-14 The world expert in multisensory perception on the remarkable ways we can use our senses to lead richer lives Talks total sense lots of fun facts right up there with the best of the best Chris Evans Packed with studies on pain attention memory mood The Times How can the furniture in your home affect your wellbeing What colour clothing will help you play sport better And what simple trick will calm you after a tense day at work In this revelatory book pioneering and entertaining Oxford professor Charles Spence shows how our senses change how we think and feel and how by hacking them we can reduce stress become more productive and be happier We like to think of ourselves as rational beings and yet it s the scent of expensive face cream that removes wrinkles temporarily a room actually feels warmer if you use a warmer paint colour and the noise of the crowd really does affect the referee s decision Understanding how our senses interact can produce incredible results This is popular science at its unbelievable best Spence does for the senses what Marie Kondo does for homes Avery Gilbert author of What the Nose Knows Everything you need to know about how to cope with the hidden sensory overload of modern life engagingly told Robin Dunbar author of How Many Friends Does One Person Need Time, Law, and Change Sofia Ranchordás, Yaniv Roznai, 2020-04-16 Offering a unique perspective on an overlooked subject the relationship between time change and lawmaking this edited collection brings together world leading experts to consider how time considerations and social political and technological change affect the legislative process the interpretation of laws the definition of the powers of the government and the ability of legal orders to promote innovation Divided into four parts each part considers a different form of interaction between time and law and change The first part offers legal theoretical and historical perspectives on the relationship between time and law and how time shaped law and influences legal interpretation and constitutional change The second part offers the reader an analysis of the different ways in which courts approach the impact of time on law as well as theoretical and empirical reflections upon the meaning of the principle of legal certainty legitimate expectations and the influence of law over time The third part of the book analyses how legislation and the legislative process addresses time and change and the various challenges they create to the legal order The fourth and final part addresses the complex relationship between fast paced technological change and the regulation of innovations Hacking Life Joseph M. Reagle, Jr., 2020-02-18 In an effort to keep up with a world of too much life hackers sometimes risk going too far Life hackers track and analyze the food they eat the hours they sleep the money they spend and how they re feeling on any given day They share tips on the most efficient ways to tie shoelaces and load the dishwasher they employ a tomato shaped kitchen timer as a time management tool They see everything as a system composed of parts that can be decomposed and recomposed with algorithmic rules that can be understood optimized and subverted In Hacking Life Joseph Reagle examines these attempts to systematize living and finds that they are the latest in a long series of self improvement methods Life hacking he writes is self help for the digital age s creative class Reagle

chronicles the history of life hacking from Benjamin Franklin's Poor Richard's Almanack through Stephen Covey's 7 Habits of Highly Effective People and Timothy Ferriss's The 4 Hour Workweek. He describes personal outsourcing, polyphasic sleep, the quantified self, movement and hacks for pickup artists. Life hacks can be useful, useless and sometimes harmful, for example if you treat others as cogs in your machine. Life hacks have strengths and weaknesses which are sometimes like two sides of a coin: being efficient is not the same thing as being effective; being precious about minimalism does not mean you are living life unfettered and compulsively checking your vital signs is its own sort of illness. With *Hacking Life*, Reagle sheds light on a question even non-hackers ponder: what does it mean to live a good life in the new millennium.

Hacking Neuroplasticity Joyce Shaffer, 2024-11-29. Neuroplasticity is the ability of neural networks in the brain to change through growth and reorganization. It is when the brain is rewired to function in some way that differs from how it previously functioned. How does aging affect neuroplasticity? As we grow older, plasticity decreases to stabilize what we have already learned. What influence does the aging process have on memory? Forgetfulness can be a normal part of aging. As people get older, changes occur in all parts of the body, including the brain. As a result, some people may notice that it takes longer to learn new things, they don't remember information as well as they did or they lose things like their glasses. This book on evolving neuroscience is unique in its lifespan focus on driving neuroplasticity in a positive direction to influence the Flynn effect of increasing human intelligence as the preferred way to prevent delay onset and/or reverse dementia. It considers potential impact from the first moments of life through end of life. It includes intergenerational activities. Its inclusion of centenarians and supercentenarians provides examples of Super Agers who have maintained and/or increased neurocognitive capacity often with a health span that approximated their vigorous longevity. It discusses the use of the Artificial Intelligence (AI) revolution to refine, personalize and broaden our global reach to enhance the Flynn effect as the preferred effort to improve global statistics on neurocognitive functioning at any age. Driving neuroplasticity in a positive direction at all ages is urgent. With this book's focus on evidence-based interventions at any age which can have physical, emotional, neurobiological, neurochemical, immunological and social health benefits, it is a unique overview and application of evolving neuroscience to address the UN/WHO Decade of Action for Healthy Ageing for All.

Jenness, Jay H. Potter, Jenness, **Future Crimes** Marc Goodman, 2015-02-24 NEW YORK TIMES and WALL STREET
JOURNAL BESTSELLER ONE OF THE WASHINGTON POST S 10 BEST BOOKS OF 2015 One of the world s leading
authorities on global security Marc Goodman takes readers deep into the digital underground to expose the alarming ways
criminals corporations and even countries are using new and emerging technologies against you and how this makes
everyone more vulnerable than ever imagined Technological advances have benefited our world in immeasurable ways but
there is an ominous flip side our technology can be turned against us Hackers can activate baby monitors to spy on families
thieves are analyzing social media posts to plot home invasions and stalkers are exploiting the GPS on smart phones to track
their victims every move We all know today s criminals can steal identities drain online bank accounts and wipe out computer
servers but that s just the beginning To date no computer has been created that could not be hacked a sobering fact given
our radical dependence on these machines for everything from our nation s power grid to air traffic control to financial
services Yet as ubiquitous as technology seems today just over the horizon is a tidal wave of scientific progress that will leave
our heads spinning If today s Internet is the size of a golf ball tomorrow s will be the size of the sun Welcome to the Internet
of Things a living breathing global information grid where every physical object will be online But with greater connections
come greater risks Implantable medical devices such as pacemakers can be hacked to deliver a lethal jolt of electricity and a
car s brakes can be disabled at high speed from miles away Meanwhile 3 D printers can produce AK 47s bioterrorists can
download the recipe for Spanish flu and cartels are using fleets of drones to ferry drugs across borders With explosive
insights based upon a career in law enforcement and counterterrorism Marc Goodman takes readers on a vivid journey
through the darkest recesses of the Internet Reading like science fiction but based in science fact Future Crimes explores
how bad actors are primed to hijack the technologies of tomorrow including robotics synthetic biology nanotechnology virtual
reality and artificial intelligence These fields hold the power to create a world of unprecedented abundance and prosperity
But the technological bedrock upon which we are building our common future is deeply unstable and like a house of cards
can come crashing down at any moment Future Crimes provides a mind blowing glimpse into the dark side of technological
innovation and the unintended consequences of our connected world Goodman offers a way out with clear steps we must
take to survive the progress unfolding before us Provocative thrilling and ultimately empowering Future Crimes will serve as
an urgent call to action that shows how we can take back control over our own devices and harness technology s tremendous
power for the betterment of humanity before it s too late The 4-hour Chef Timothy Ferriss, 2012 Building upon Timothy
Ferriss s internationally successful 4 hour franchise The 4 Hour Chef transforms the way we cook eat and learn Featuring
