Investigating and identifying reasons for brand loyalty of the Apple-iPhone brand in Germany Mona Carolina Frank, 2015-02-05 Bachelor Thesis from the year 2013 in the subject Business economics Offline Marketing and Online Marketing grade 1.7 Karlsruhochschule International University course International Marketing language English abstract The aim of this thesis is to investigate and identify reasons for brand loyalty of the Apple iPhone

brand in Germany and to make recommendations for customer relationship and brand managers The methods used are secondary and primary quantitative research with a cross sectional online survey consisting of a 5 point Likert scale Brand loyalty is operationalized as switching intention based on prior research The theoretical background shows that there are two contrary views when investigating switching intention On the one side there is the conventional perspective with the motivation of functional utility maximization People are motivated to switch a brand when they believe they will gain perceived value which is the customer s overall assessment of the utility of a product based on perceptions of what is received and what is given On the other side there is the social identity theory perspective with social mobility as motivation Social mobility refers to a person s attempt to part him or herself from a group With regard to brands this implies that customers switch brand identities when they believe they identify themselves more with another brand Those two perspectives have been tested using two hypotheses with an online survey and 111 valid responses of Apple iPhone users in Germany The independent variables perceived value customer brand identification and procedural switching costs were investigated using items from prior research Items by an advanced theory of the technology acceptance model were used for perceived value To analyze the data descriptive reliability correlation and regression analyses have been applied In conclusion customer brand identification and procedural switching costs shows an equally strong significance for predicting switching intention Perceived value could not be measured since it did not pass the stepwise multiple regression analysis

Wirtschaftspolitik Note 1,3 Universität Hamburg Lehrstuhl für Wirtschaftspolitik und Industriekonomenik Veranstaltung Seminar in Wirtschaftspolitik Sprache Deutsch Abstract Am 17.09.2007 entschied der europäische Gerichtshof erster Instanz, dass die Entscheidung der EU Kommission vom März 2004 bezüglich des Missbrauchs von Microsofts marktbeherrschender Stellung sowie die von ihr verhängten Maßnahmen gegen den Missbrauch rechtmäßig waren Diese Entscheidung stellt somit den Schlusspunkt des ersten Aktes von EU vs Microsoft dar Ein Abschluss dieses Verfahrens ist auch nach fast 10 Jahren nicht absehbar Seit der Entscheidung von 2004 traten neue Differenzen zwischen der EU und Microsoft auf, welche im Wesentlichen mit den von der EU Kommission formulierten Auflage zur Freigabe von Informationen zur Interoperabilität von Windows zu tun haben Ein wichtiges Element zum Verständnis der heutigen Differenzen stellen dabei die technischen Besonderheiten der beiden betroffenen Produktkategorien dar Media Player und Work Group Server So war der heutige Konflikt zwischen Microsoft und der EU für diejenigen, die von der engen Verknüpfung der Windows Architektur mit den Schnittstellen wussten, absehbar Bei Media Playern beschränkt sich diese Arbeit auf die Problematik um den Vertrieb von digitalen Inhalten und die hierfür notwendigen Technologien Andere Bereiche wie die eingebettete Wiedergabe von Medien in Internetseiten oder auf Mobiltelefonen werden aufgrund der dynamischen Entwicklung dieses Bereichs in den letzten Monaten ausgeblendet Hier kann erst nach der vollständigen Markteinführung von Microsofts neuer Technologie Silverlight

dem neuen Betriebssystem Vista und der Reaktion von Wettbewerbern und Regulierern hierauf eine umfassende Betrachtung erfolgen Diese Arbeit ist in drei Teile gegliedert Der erste Teil befasst sich mit der Marktsituation bei Media Playern und Microsofts strategi
