Transnational Streaming Television Joseph Straubhaar, Swapnil Rai, Melissa Santillana, Silvia Dalben, 2025-09-29 Examining the impact of streaming on the global production and flow of television and film this book provides an innovative theoretical framework to conceptualize how asymmetric dynamics of power play out in the era of global streaming This book analyses Netflix and Amazon Prime Video two tech based digital native streamers and compares them to Disney and HBO Max Warner Bros Discovery two legacy Hollywood studios with cable TV and broadcasting operations now pursuing global streaming The book

compares their different models of operation and specifically explores how these four streamers particularly Netflix are co-producing and commissioning television programs and films in an increasing number of countries. It also examines how this trend is creating new opportunities for independent producers and soft power for the producing nations. This book further considers the direct algorithmic targeting of individuals by their genre preferences across boundaries of culture, language and nation boundaries that previously protected national and regional television markets, creating a new flow of data colonialism. At a more local level, the book also examines some of the national and regional streaming platforms emerging in some of the key players in the Global South: Brazil, India and Mexico. This is essential reading for students, researchers and academics interested in media studies, global media and global television studies. *STFU* Dan Lyons, 2023-03-07
