Microexpression Manual:

Microexpressions Manual Danilo H. Gomes, 2020-05-19 Body language is one of the most complex and effective studies in psychology and psychiatry. Reading human gesture techniques are present in police investigations, psychotherapy clinics, schools, and other related places. While generally being assertive, observing body gestures can provide some confusing and ambiguous information. When dealing with micro facial expressions, the chances of getting it right are very high; in addition, your observation provides more accurate information. Hostage Negotiation Manual Edenilson Brandl, This book is an important guide for a number of professions including police officers, military personnel, special forces, firefighters, journalists, and security agents. It is also highly relevant for those in the fields of diplomacy, law, education, and social work. The book aims to serve as a detailed and technical resource suitable for both beginners and experienced professionals in this complex field. The manual is unique in that it integrates knowledge from various disciplines including psychology, engineering, and pedagogy to create a holistic approach. It emphasizes that crisis management is an evolving field that requires not only specific technical skills but also a solid foundation in human psychology and ethical principles. The author encourages the reader to see the text as a tool for professional development, a resource that bridges theoretical knowledge with practical application. It highlights the importance of continuous learning and interdisciplinary collaboration to master the art of resolving critical situations and serves as a call to action for professionals to prepare for the challenges of an interconnected world. *Recognizing Microexpression: An Interdisciplinary Perspective* Xunbing Shen, Wenfeng Chen, Guoying Zhao, Ping Hu, 2019-11-14 As a Chinese saying goes, "Look at the weather when you step out, look at men's faces when you step in." Recognizing expressions is a very common activity in daily life. People can infer someone's inner emotions from his or her facial expressions. However, not everyone writes their emotion on their face; someone may suppress true emotion and express a false facial expression depending on politeness, context, culture, or status. The suppressed expressions can be expressed fleetingly in the form of microexpressions, which usually last only 1/25 to 1/5 second. Microexpressions were of importance for many practical applications because they reflect the true inner feeling, such as national security, deception detection, clinical therapy, emotion analysis, and human-computer interaction. The recognition of microexpressions is the premise of application of microexpression, and now the recognition of microexpressions is getting more and more attention. However, perceiving other's microexpressions is not easy. The context, culture, and perceiver himself affect the recognition of microexpression. There are considerable efforts in the field of psychology, neuroscience, and computer science to recognize facial microexpressions. This Research Topic illuminates the latest advances in interdisciplinary understanding of how microexpressions are perceived and recognized. The authors contribute from diverse perspectives in the current research topic by using behavioral experiment, EEG, fMRI, and computer vision techniques. They investigated how humans recognize macroexpressions and microexpressions in terms of modulating factors, e.g., gender, duration, and the underlying neural

mechanisms and how machine recognition algorithms and models are developed and inspired by the human recognition data. The Research Topic reveals that research on the recognition of microexpressions is diverse but progressing. This is not surprising given that this topic receives more and more attention due to its promising potential applications. As new techniques and theories develop, it is likely that efficient and effective algorithms for recognizing microexpression will become possible. We hope that these articles provide a look into that future.
