the publisher's website includes color versions of all figures, recipes with all the MATLAB commands featured in the book, the example data, exported MATLAB graphics, and screenshots of the most important steps involved in processing the graphics.

Leadership as a Habit of Mind Barbara Mackoff, Gary Wenet, 2005 Leadership as a Habit of Mind is an insightful and original work. The book is compulsively readable for its stories of personal experiences that have shaped the way leaders think and act. Even better, it offers a new concept: habits of mind that will help other leaders and would-be leaders to understand their own formative experiences and use them wisely. HOWARD SCHULTZ, Chairman and Chief Global Strategist, Starbucks Coffee Company: What an amazing way to think about leadership. These fascinating real leader stories persuasively teach that sustainable public victories come from the inner work of private victories. Dr STEPHEN R COVEY, author of The Seven Habits of Highly Effective People: A deeply moving book about leaders who know how to move leaders to great possibilities. Spiritual and practical, complex and profoundly simple. An important and unique addition to the leadership literature. WARREN BENNIS, Distinguished Professor of Business, University of Southern California and author of Managing the Dream and On Becoming a Leader: The mystery of leadership gets a jolt of real-life enlightenment thanks to Mackoff and Wenet's sparkling new book. The authors supply a big missing piece: what really goes on inside a leader's head by tapping into some of the best leadership talent around and giving us a front-row seat to the way these people think. Instead of offering the same tired old profiles and how-tos, this book bristles with energy, originality, and oomph. NANCY K AUSTIN, coauthor of A Passion for Excellence: Enlightened leadership comes from within, as Drs Mackoff and Wenet's provocative new book clearly illuminates. This intelligent, well-researched book should be required reading for executives and entrepreneurs alike; it is an invaluable guide for those who aspire to inspire the people and organizations that will flourish in this new century. JANE ADAMS, author of Women on Top and Making Good Conversations with Successful Men. PowerPoint, Communication, and the Knowledge Society Hubert Knoblauch, 2013 This book explores the dynamics and limitations of PowerPoint as a means of communication. 1394/USB Newsletter, **Windows Magazine**, 1998 *English Skills for College Freshmen*,

Terrorism Unjustified Vicente Medina, 2015-10-29 Vicente Medina challenges common misconceptions and excuses for extreme political violence. Countering such axioms as "one man's freedom fighter is another man's terrorist" and the do-whatever-it-takes attitude toward counterterrorism, Medina differentiates between justified political violence and unjustifiable terrorism. Surveying terrorism with both historical and contemporary examples, Medina dispels the relativism and emotional responses that have been used by some to justify terrorist acts. Medina draws on philosophical concepts like just war theory while adding social and political science perspectives to contextualize today's terrorism within current international law and moral attitudes. **Design to Thrive** Tharon Howard, 2009-12-08 Social networks and online communities are reshaping the way people communicate both in their personal and professional lives. What makes some succeed and others fail? What draws a user in? What makes them join? What keeps them coming back? Entrepreneurs and

businesses are turning to user experience practitioners to figure this out Though they are well equipped to evaluate and create a variety of interfaces social networks require a different set of design principles and ways of thinking about the user in order to be successful Design to Thrive presents tried and tested design methodologies based on the author s decades of research to ensure successful and sustainable online communities whether a wiki for employees to share procedures and best practices or for the next Facebook The book describes four criteria called RIBS which are necessary to the design of a successful and sustainable online community These concepts provide designers with the tools they need to generate informed creative and productive design ideas to think proactively about the communities they are building or maintaining and to design communities that encourage users to actively contribute Provides essential tools to create thriving social networks helping designers to avoid common pitfalls avoid costly mistakes and to ensure that communities meet client needs Contains real world stories from popular well known communities to illustrate how the concepts work Features a companion online network that employs the techniques outlined in the book
