Environmental Immunochemical Analysis Detection of Pesticides and Other Chemicals Shirley J. Gee,Bruce D. Hammock,Jeanette M. Van Emon,2008-10-19

This book is a tutorial designed to instruct the reader in use and application of immunochemical methods of analysis for environmental contaminants A brief introduction describes basic principles and the advantages and disadvantages of the technology and gives a listing of references which supply more detail

Preparation of the laboratory for use of this technology and the general scientific considerations prior to using the technology are discussed Detailed step wise procedures are given for analysis of selected analytes triazine herbicides carbaryl paraquat and p nitrophenols etc

In addition to the specific immunoassay methods a series of support techniques necessary to perform immunochemical methods are described This book provides specific instruction for certain analytes but also serves to familiarize the novice reader with many generic concepts needed to successfully utilize immunochemistry technology

including applications sampling sample preparation extraction cleanup quality assurance methods development and optimization data handling and troubleshooting It is not necessary for the reader to actually perform the immunoassays given in this user s guide to obtain familiarity with these concepts

The guide is written so that the information presented can be applied to other immunoassays not given here Thus the strength of the guide is its universal applicability to immunoassay methods
