American Architects James F. O'Gorman, 1992-09-15 Discusses the individual and collective achievement of the three American architects *American Architects and the Single-Family Home* Lisa M. Tucker, 2015-07-24 American Architects

and the Single Family Home explains how a small group of architects started the Architects Small House Service Bureau in 1919 and changed the course of twentieth century residential design for the better Concepts and principles they developed related to public spaces private spaces and service spaces for living details about the books they published to promote good design as well as new essays from contemporary practitioners will inspire your own designs More than 200 black and white images **American Architects and the Mechanics of Fame** Roxanne Kuter Williamson, 2014-03-07 Why does one

talented individual win lasting recognition in a particular field while another equally talented person does not While there are many possible reasons one obvious answer is that something more than talent is requisite to produce fame The something more in the field of architecture asserts Roxanne Williamson is the association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated In this study of more than six hundred American architects who have achieved a place in architectural histories Williamson finds that only a small minority do not fit the right person right time pattern She traces the apprenticeship connection in case studies of Louis Sullivan Frank Lloyd Wright Henry Hobson Richardson the firm of McKim Mead White Latrobe and his descendants the Bulfinch and Renwick Lines the European immigrant masters and Louis Kahn Although she acknowledges and discusses the importance of family connections the right schools self promotion scholarships design competition awards and promotion by important journals Williamson maintains that the apprenticeship connection is the single most important predictor of

architectural fame She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self confidence to be true to one s own vision Perhaps she says this is the case in all the arts American Architects and the Mechanics of Fame is sure to provoke thought and comment in architecture and other creative fields
