areas will also require different solutions than in rural areas due to the difference in urban and rural food environments In line with the structural transformation of the economy farm households also increasingly rely on non farm income to support their livelihoods and risk management strategies which has implications for the uptake of new technologies The demographic shifts urbanization and structural changes in the economy coupled with climate change have made the food security and nutrition problem more complex than it was in the past Solutions require input from different stakeholders both public and private as well as a range of government ministries including Health Finance Education Environment Trade and Social Welfare in addition to Agriculture
