D. T. Suzuki on the Unconscious in Zen Art, Meditation, and Enlightenment Steve Odin, 2025-07-01 A comprehensive study of D T Suzuki s Zen philosophy and philosophical psychology in relation to his Buddhist understanding of the cosmic Unconscious This book explores how the Japanese philosopher D T Suzuki 1870 1966 developed an integral synthesis of Eastern and Western sources to establish a modern philosophical psychology of the cosmic Unconscious which he in turn used as the basis to interpret every aspect of Zen art meditation and enlightenment Beyond Freud s personal unconscious and Jung s collective unconscious according to Suzuki is the cosmic Unconscious of Zen which as absolute nothingness is the fountain of inexhaustible creative potentialities and the source of all Zen inspired arts The book demonstrates that like the Kyoto School of modern Japanese philosophy Suzuki s Zen endeavors to overcome the

existential problem of nihilism or relative nothingness by shifting to the openness of absolute nothingness wherein emptiness is fullness and all things are disclosed in the evanescent beauty of their suchness Suzuki however formulates his scheme in terms of a depth psychology where the cosmic Unconscious is the encompassing locus of absolute nothingness Ultimately the book argues that by integrating both Eastern and Western views of the unconscious psyche including the different schools of Zen and Mahayana Buddhism as well as American French and German theories of the unconscious Suzuki's Zen concept of the cosmic Unconscious constitutes a significant original contribution to philosophical psychology

Perspectives on Synchronicity, Inspiration, and the Soul Rico Sneller, 2020-07-07 This book explores the notion of the human psyche soul and its continuing usefulness in the background of the ongoing and always accelerating techno scientific revolution The main argument here follows the assumption that this revolution while not necessarily being a threat to humankind is often blind or ignorant as to its subject the human being In the first chapters the reader is invited to reflect on the notion of thinking as a phenomenon of consciousness that transcends merely having thoughts Relating thinking to consciousness requires reconsidering the phenomena of inspiration and ecstasy Provided that such a thing as inspiration exists it makes sense to revise the solipsist or substantialist account often given of the human mind The book defines inspiration as a clairvoyance of one's psyche and ecstasy as the experience of this clairvoyance Next a case is made for synchronicity experiences as a key to a better understanding of the human psyche While being enigmatic all throughout synchronicity experiences both on the individual and on the collective level help overcome both subject object and body mind dualisms It is not likely though that the solution they could offer will be readily accepted by what is called science today since it challenges one of the latter's basic premises causality As a more concrete example of a condensed synchronicity experience the author dwells on physiognomy In the final chapter death and suffering are discussed as extreme and therefore relevant experiences of consciousness The book interprets death in terms of enhanced subliminality and suffering as unconscious resistance against maturing Generally this book explores a psycho philosophical tradition rooted in Romantic thinking from Schelling and Schopenhauer until Klages and Jung which has hitherto been unjustly neglected if not repressed by mainstream materialism and positivism It makes a strong case for an intellectual account of the soul

Transversal Rationality and Intercultural Texts Hwa Yol Jung, 2011-07-26 Winner of the 2012 Edward Goodwin Ballard Prize sponsored by the Center for Advanced Research in Phenomenology Transversality is the keyword that permeates the spirit of these thirteen essays spanning almost half a century from 1965 to 2009 The essays are exploratory and experimental in nature and are meant to be a transversal linkage between phenomenology and East Asian philosophy Transversality is the concept that dispels all ethnocentrism including Eurocentrism In the globalizing world of multiculturalism Eurocentric universalism falls far short of being universal but simply parochial at the expense of the non Western world Transversality is intercultural interspecific interdisciplinary and intersensorial Transversal Rationality and Intercultural Texts means to transform the very way of philosophizing itself by infusing or hybridizing multiple traditions in the history of the world Like no other scholar Jung bridges the gap between Asian and Western cultures What is traditionally called comparative philosophy is not just a neglected branch of philosophy it is poised to radically transform the very conception of philosophy itself

The Mindbrain and Dreams Mark J. Blechner, 2018-04-27 In *The Mindbrain and Dreams: An Exploration of Dreaming, Thinking and Artistic Creation* Mark J.
