Overdevelopment Overpopulation Overshoot:

Overdevelopment, Overpopulation, Overshoot Tom Butler, Foundation for Deep Ecology, 2015 Every major problem facing humanity is exacerbated by a needlessly ballooning human population So why is the explosive growth of the human family more than sevenfold since the Industrial Revolution and still expanding rapidly generally ignored by policy makers and the media And why has the environmental movement chosen to be mostly silent about the fundamental driver of species loss and the destruction of wildlife habitats around the globe Isn't it time to start speaking out about the equation that matters most to the future of people and the planet The publication centerpiece of the Global Population Speakout campaign Overdevelopment Overpopulation Overshoot OVER moves beyond insider debates and tired arguments human numbers and overconsumption are both responsible for the crisis of population overshoot Anchored by a series of provocative photo essays OVER presents the stark reality of a world transformed by human action action that threatens our future and the buzzing blossoming diversity of life with which we share the planet Publisher website **Overdevelopment Overpopulation**

Overshoot Population Institute, 2015 [A Future Beyond Growth](#) Haydn Washington, Paul Twomey, 2016-04-14 There is a fundamental denial at the centre of why we have an environmental crisis a denial that ignores that endless physical growth on a finite planet is impossible Nature provides the ecosystem services that support our civilisation thus making humanity unavoidably dependent upon it However society continues to ignore and deny this dependence A Future Beyond Growth explores the reason why the endless growth economy is fundamentally unsustainable and considers ways in which society can move beyond this to a steady state economy The book brings together some of the deepest thinkers from around the world to consider how to advance beyond growth The main themes consider the deep problems of the current system and key aspects of a steady state economy such as population throughput and consumerism ethics and equity and policy for change The policy section and conclusion bring together these various themes and indicates how we can move past the growth economy to a truly sustainable future This volume will be of great interest to students and scholars of economics sustainability and environmental studies in general **Environmental Legacies of the Copernican Universe** Jean-Marie

Kauth, 2023-04-11 In Environmental Legacies of the Copernican Universe Jean Marie Kauth shows how counter ecological metaphors sprung from the cosmology of the Copernican Revolution influence us still in unexpected maladaptive ways nurturing conceptions of the world that are not only incorrect but enabling of ecocide She argues that grasping these underlying paradigms may help us to alter our thinking and make the radical transformations needed to counter the forward motion of our capitalist post industrial society **Developing Eco-Cities Through Policy, Planning, and Innovation:**

Can It Really Work? Management Association, Information Resources, 2019-07-05 The worldwide consumption of resources is causing environmental damage at a rate that cannot be sustained Apart from the resulting environmental and health problems this trend could threaten economic growth due to rapidly decreasing natural resources and costly solutions The

public sector has a responsibility to stimulate the marketplace in favor of the provision of more resource efficient and less polluting goods services and works in order to support environmental and wider sustainable development objectives

Developing Eco Cities Through Policy Planning and Innovation Can It Really Work examines the economic political social and environmental objectives essential to the planning and support of future communities Highlighting a range of topics such as environmental sustainability waste management and green cities this publication is an ideal reference source for environmental engineers environmentalists city development planners urban planners technology developers policymakers industrialists academicians and researchers interested in solving environmental issues

Racial Climates, Ecological Indifference Nancy Tuana, 2023 While the heavy social impacts of raging wildfires punishing storms and climbing temperatures worldwide have made many increasingly aware of the need for climate justice the intersection of race and climate change has too often been neglected in the literature and in practice In *Racial Climates Ecological Indifference* author Nancy Tuana urges that engagement with histories and lineages of ecological indifference and systemic racism leads to a more robust understanding of the nature of climate injustices Applying her ecointersectional framework Tuana reveals how racist institutions and practices often fuel environmental destruction and contribute to climate change Building on the work of Black feminist theorists she demonstrates that the basic social structures that generate environmental destruction are the same as those that generate systemic oppression making clear that the more traditional focus on the differential distribution of harms and benefits of climate change while important constitutes only one dimension of climate injustice due to systemic racism This book provides a more adequate account of racial climates by disclosing the additional dimensions of climate injustice Ultimately Tuana underscores that any effort to protect the environment must also be a fight against systemic racism and other forms of systemic inequity

Interdisciplinary Essays on Environment and Culture Luigi Manca, Jean-Marie Kauth, 2015-12-24 This is a collection of essays about the media the environment and the whole of humanity at the brink of extinction As the demands of overpopulation and of an unsustainable consumer economy dry up existing natural resources and destroy vital ecosystems that we need to survive the corporate controlled media saturate worldwide audiences with a barrage of hypnotic images and narratives to stimulate over consumption and to distract us from the consequences of rampant consumerism while remaining silent about the systematic destruction of the environment and our future Academicians from the across the sciences the social sciences the arts and the humanities engage in an interdisciplinary discussion informed by a vision of an interconnected humanity and focused on the role of the media in forging public discourse Contributors to the collection argue that today's media are failing humanity Rather than providing pictures of reality on which the world's citizens can act the corporate controlled media are widely used as instruments of commercial and political propaganda creating an immense web of images and narratives that their creators know to be not true fabrications designed to sell to manipulate in a sense to enslave worldwide audiences At the core of the discussion in

this book is a utopian vision of one unified humanity billions of people whose destinies and dreams are imbricated and interdependent and who share the same world the same habitats It is a vision of a world that cherishes diversity but is also united a world where our differences are no longer a cause for conflict and where separate countries or separate ethnic or religious communities no longer have to compete or wage war to exploit available resources As extensions of humans the media can be instruments of salvation instead of destruction liberation instead of oppression But first we must recognize the challenges we face What We Are: The Evolutionary Roots of Our Future Lonnie Aarssen, 2022-07-05 Other animals are driven to spend essentially their whole lives just trying to get fed stay alive and get laid That s about it The same was true for our proto human ancestors And modern humans of course also require a Survival Drive and a Sex Drive in order to leave descendants But today we spend most of our lives mainly just trying to convince ourselves that our existence is not absurd In What We Are Queen s University biologist Lonnie Aarssen traces how our biocultural evolution has shaped Homo sapiens into the only creature that refuses to be what it is the only creature preoccupied with a deeply ingrained and absurd sentiment I have a distinct mental life an inner self that exists separately and apart from material life and so unlike the latter need not come to an end This delusion conceivably gave our distant ancestors some wishful thinking for finding some measure of relief from the terrifying uniquely human knowledge of the eventual loss of corporeal survival But this came with an impulsive nagging doubt an obsessive underlying uncertainty self impermanence anxiety Biocultural evolution however was not finished It also gave us two additional uniquely human primal drives both serving to help quell the burden of this anxiety Legacy Drive generates delusional cultural domains for extension of self and Leisure Drive generates pleasurable cultural domains for distraction escape from self Legacy Drive and Leisure Drive Aarssen argues represent two of the most profound consequences of human cognitive and cultural evolution What We Are advances propositions regarding how a visceral susceptibility to self impermanence anxiety has paradoxically played a pivotal role in rewarding the reproductive success of our ancestors and has thus been a driving force in shaping fundamental motivations and cultural norms of modern humans More than any other milestone in the evolution of human minds self impermanence anxiety and its mitigating Drives for Legacy and Leisure account for not just the advance of civilization over the past many thousands of years but also now its impending collapse Effective management of this crisis Aarssen insists will require a deeper and more broadly public understanding of its Darwinian evolutionary roots as laid out in What We Are **Reproductive Rights and Wrongs** Betsy Hartmann, 2016-11-21 Those involved in women s health issues Third World studies and economic development should find food for thought Kirkus Reviews This is an updated edition of the influential study Publishers Weekly of issues surrounding childbirth and the history of population control programs Challenging conventional wisdom about overpopulation and uncovering the deeper roots of poverty environmental degradation and gender inequalities the author uses data and vivid case studies to explore how population control programs came to be promoted by powerful governments foundations and

international agencies as an instrument of Cold War development and security policy. Mainly targeting poor women, these programs were designed to drive down birth rates as rapidly and cheaply as possible with coercion often a matter of course. In the war on population growth, birth control was deployed as a weapon rather than a tool of reproductive choice. Threaded throughout is the story of how international women's health activists fought to reform population control and promote a new agenda of sexual and reproductive health and rights for all. While their efforts bore fruit, obstacles remain. On one side is the anti-choice movement that wants to deny women access not only to abortion but to most methods of contraception. On the other is a resurgent, well-funded population control lobby that often obscures its motives with the language of women's empowerment. Despite declining birth rates worldwide, average global family size is now 2.5 children; overpopulation alarm is on the rise, tied now to the threats of climate change and terrorism. *Reproductive Rights and Wrongs* reveals how these developments are rooted in the longer history and politics of population control. In this book, a new generation of readers will find knowledge and inspiration for the ongoing struggle to achieve reproductive rights and social, environmental, and gender justice.

Bioeconomical Solutions and Investments in Sustainable City Development Vargas-Hernández, José G., Zdunek-Wielgołaska, Justyna Anna, 2019-03-22

Spatial development is a discipline aimed at the protection of specific values and rational development by stimulating economic processes. Modern practices challenge developers to minimize the negative impact of urban development on the environment. In order to adhere to this policy, bioeconomical solutions and investments can be utilized. *Bioeconomical Solutions and Investments in Sustainable City Development* is an essential source that explores the development of sustainable city models based on investments in eco-oriented solutions by protecting and making publicly available green areas and by innovative investments with the use of bioeconomical solutions. Featuring research on topics such as bioeconomy, vision, environmental education, and rural planning, this book is ideally designed for architects, urban planners, city authorities, experts, officers, business representatives, economists, politicians, academicians, and researchers.

Ecological Justice and the Extinction Crisis Anna Wienhues, 2020-10-07. ePDF and ePUB available. Open Access under CC BY-NC-ND licence. As the biodiversity crisis deepens, Anna Wienhues sets out radical environmental thinking and action to respond to the threat of mass species extinction. The book conceptualises large-scale injustice endangering non-humans and signposts new approaches to the conservation of a shared planet. Developing principles of distributive ecological justice, it builds towards a bold vision of just conservation that can inform the work of policy makers and activists. This is a timely, original, and compelling investigation into ethics in the natural world during the Anthropocene and a call for biocentric ecological justice before it is too late.

Getting the Climate Science Facts Right Medani P. Bhandari,2022-09-01 Getting the Climate Science Facts Right discusses climate change science with reference to the Intergovernmental Panel on Climate Change

IPCC Addressing climate change is the most important public priority of the 21st Century Unlike many issues however this issue is being driven by both science and its interface with politics The main institution for bridging this division between science and international politics is the IPCC As such it is the main source of the facts from which climate change policy is developed This book describes the ways in which the IPCC arrives at these facts and so can be sure they are complete and evidence based Seldom in history has science had such a direct relationship with politics The negotiation of an international policy regime requires at its outset an agreement on the facts In this case the facts are scientific complex and contentious Governments have recognized this and have by using the IPCC set up institutional machinery to provide facts from a source and in a manner that they can accept The way in which the IPCC functions is unique in that it melds the way in which science achieves consensus with the way governments do at the international level Starting with a process to examine review and debate scientific findings leading to a consensus about scientific fact usually expressed as probabilities that the findings will hold over time the IPCC then concludes by using the kind of consensus development mechanism that the United Nations typically uses to achieve agreements leading to the formation of policy regimes The book examines the structure of the IPCC its composition and its procedures in order to achieve an understanding of its role and future *Handbook of Cities and the Environment* Kevin Archer, Kris Bezdecny, 2016-12-30 With an ever growing majority of the world's human population living in city spaces the relationship between cities and nature will be one of the key environmental issues of the 21st Century This book brings together a diverse set of authors to explore the various aspects of this relationship both theoretically and empirically Rather than considering cities as wholly separate from nature a running theme throughout the book is that cities and city dwellers should be characterized as intrinsic in the creation of specifically urban generated socio natures

Yellowstones Survival Susan G. Clark, 2021-05-15 This book focuses on Yellowstone the park the larger ecosystem and even more so the idea of Yellowstone In presenting a case for a new conservation paradigm for the Greater Yellowstone Ecosystem GYE including Yellowstone National Park the book at its heart is about people and nature relationships This new paradigm will be truly committed to a healthy sustainable environment rich in other life forms and one that affords dignity for all humans and nonhumans The new story or paradigm must be about living such a commitment and future for GYE in real time The book presents a well developed theory for interdisciplinary problem solving that is grounded in practice

The America Syndrome Betsy Hartmann, 2017-05-23 Has apocalyptic thinking contributed to some of our nation's biggest problems inequality permanent war and the despoiling of our natural resources From the Puritans to the present historian and public policy advocate Betsy Hartmann sheds light on a pervasive but until now invisible theme shaping the American mindset apocalyptic thinking or the belief that the end of the world is nigh Hartmann makes a compelling case that apocalyptic fears are deeply intertwined with the American ethos to our detriment In *The America Syndrome* she seeks to reclaim human agency and in so doing revise the national narrative By changing the way we think we just might change the
