Practical Embedded Security Timothy Stapko, 2011-04-01 The great strides made over the past decade in the complexity and network functionality of embedded systems have significantly enhanced their attractiveness for use in critical applications such as medical devices and military communications However this expansion into critical areas has presented embedded engineers with a serious new problem their designs are now being targeted by the same malicious attackers whose predations have plagued traditional systems for years Rising concerns about data security in embedded devices are leading engineers to pay more attention to security assurance in their designs than ever before This is particularly challenging due to embedded devices inherent resource constraints such as limited power and memory Therefore traditional security solutions must be customized to fit their profile and entirely new security concepts must be explored However there are few resources available to help engineers understand how to implement security measures within the unique embedded context This new book from embedded security expert Timothy Stapko is the first to provide engineers with a comprehensive guide to this pivotal topic From a brief review of basic security concepts through clear explanations of complex issues such as choosing the best cryptographic algorithms for embedded utilization the reader is provided with all the information needed to successfully produce safe secure embedded devices The ONLY book dedicated to a comprehensive coverage of embedded security Covers both hardware and software based embedded security solutions for preventing and dealing with attacks Application case studies support practical explanations of all key topics including network protocols wireless and cellular communications languages Java and C compilers web based interfaces cryptography and an entire section on SSL

Cryopreservation in Assisted Reproduction Zsolt Peter Nagy, Alex C. Varghese, Ashok Agarwal, 2024-07-15 Cryopreservation of oocytes sperm and ovarian and testicular tissues as well as embryos is one of the most critical procedures to preserve the reproductive capacity of individuals It is an indispensable part of assisted reproductive technologies as nearly all IVF clinics around the world have embraced the freeze all embryo strategy with no fresh embryo transfers Advanced platforms such as automation and artificial intelligence are making their way into all aspects of assisted reproductive technologies including reproductive tissue banking process and storage At the same time lax regulations and lack of training combined with rapid demands of IVF

services have resulted in a climate of frequent disaster and catastrophic incidents from the cryo labs that store thousands of patients embryos for years With the onset of malpractice lawsuits against the clinics and awards of large compensation to the patients regulations are getting stricter in this arena to safeguard the integrity of storage systems and industry leaders are developing advanced devices and alarm systems to remotely monitor storage systems exploring the power of internet AI and automation Therefore there is an urgent need for a comprehensive text in this field based on the introduction of such a wide array of advanced devices newer technologies regulatory frameworks risks and disaster management options With contributions from top internationally recognized scientists and clinicians with expertise in cryopreservation and reproductive technology this book provides a comprehensive overview of the basics of cryobiological processes and a technically detailed presentation on all aspects of cryopreservation of reproductive cells and tissues It presents the current well established procedures as well as novel techniques with the latest innovations described in detail Bringing together the latest information with key thought leaders in the field Cryopreservation in Assisted Reproduction is intended to be the go to resource for all reproductive medicine clinicians embryologists lab technologists IVF lab directors managers and researchers
