historical co development of the financial and industrial domains Thus far the communities in economics dealing with both issues are almost completely disconnected The book brings together economic research dealing with the interface between innovation and finance and highlights the importance of the Neo Schumpeterian perspective This topic is of particular interest in the current economic crisis affecting the Eurozone and its currency Most of the policy instruments discussed and implemented so far are focused on short run targets This discussion of the relationship between innovation and finance suggests a long run perspective to create new potentials for economic growth and a sustainable way out of the economic crisis
