Owners Manual 2007 International 43:

International Conflict and Conflict Management Andrew P. Owsiak, J. Michael Greig, Paul F. Diehl, 2023-05-08 This book asks scholars to reexamine international conflict and its management in order to move the field toward directly theorizing about and examining the interdependence between conflict events and conflict management attempts. Despite decades of work, research on international conflict and its management remains siloed in three fundamental ways. First, scholars do not thoroughly address international conflict dynamics within studies of conflict management, even though the former give rise to the latter. Second, existing work generally investigates one conflict management strategy, e.g., mediation, at the expense of others, e.g., adjudication. These strategies, however, are not independent of one another; they exist on a single menu from which potential third parties choose. Third parties therefore implicitly, if not explicitly, consider and select among the various strategies when deciding how to manage a conflict, thereby inviting and incorporating comparisons. Finally, researchers tend to treat conflict management efforts, even within the same conflict, as independent events, even though some efforts, e.g., adjudication or arbitration, follow and explicitly relate to other earlier efforts, e.g., an earlier negotiation or mediation. In short, elements of sequencing and interaction influence conflict management, even as scholars rarely consider such elements. This book will be of great value to scholars and researchers of Political Science, International Relations, and Conflict Management and Resolution. The chapters in this book were originally published as a special issue of *International Interactions*.
Proceedings of the Third World Conference on Floating Solutions Tomoki Ikoma, Shigeru Tabeta, Soon Heng Lim, Chien Ming Wang, 2024-06-29 This book includes peer-reviewed articles from the Third World Conference on Floating Solutions (WCFS) 2023 in Japan, with an aim to pioneer the SDGs and Next SDGs by making the most use of oceans and water. In recent years, the safety and security of people's lives around the world have been threatened by frequent floods and rising sea levels attributable to climate change. The COP 26 has set a common global goal of limiting the temperature rise to 1.5 degrees Celsius above pre-industrial levels. It is an urgent task to cope with climate change as well as to utilize decarbonized and renewable energy. The UN is promoting the SDGs, which aim to achieve 17 Goals between 2015 and 2030. However, efforts to reach the Goals will not end in 2030 but will be an ongoing challenge for humanity beyond 2030. Here we tentatively call the Goals to be achieved after the SDGs as Next SDGs. Ocean and water have the potential to provide solutions to the disasters such as flooding and sea level rise due to climate change. In this context, WCFS 2023 presents ocean and water as the urban infrastructure and explores new technology and feasible solutions. In particular, it is necessary to consider urban planning, marine architecture, port planning, connecting land and sea, disaster prevention, renewable energy, and food production on the sea and water. Further, it is indispensable that knowledge, experience, dream, and strong desire to realize these challenges are supported by a diversity of people.

Relocation Failures in Sri Lanka Robert Muggah,2013-04-04 Each year millions of people are internally displaced and resettled in the wake of wars and floods or to make way for large scale development projects and this number is increasing Humanitarian and development specialists continue to struggle with designing and executing effective protection strategies and durable solutions Relocation Failures explains how internal displacement and efforts to engineer resettlement are conceived and practiced by policy makers and practitioners The author argues that policies for internally displaced peoples are weak and diluted by narrow interpretations of state sovereignty and collective action dilemmas and in the case of Sri Lanka unintentionally intensified ethnic segregation and ultimately war This unique new book considers the origins and parameters of internal displacement and resettlement policy and practice and proposes an explanation for why it often fails In highlighting the ways that development assistance can exacerbate smoldering conflicts the volume provides an important caution to the aid community
