Mail Merge

Mail merge is the process of combining a document (such as an e-mail message, a letter, or a label) and a data source (such as a list of addresses). The finished document is customized to each entry in the data source.

The mail merge process has five main steps:

1. Create the mail merge document.
2. Connect the data source to the document.
3. Select the recipients for the mail merge from the data source.
4. Add merge fields.
5. Preview and complete the merge.

You can use the Mail Merge Wizard to guide you through these steps or you can perform them manually.

Managing Macros with the Organizer

Your current document should appear on the left (1). On the right, you will see all macros that have been saved in **Normal.dotm** (2), the document template for all new blank documents opened in Word. You can use the **drop-down menus** and the **Close File** buttons (3) for each list to modify the document whose macros are being displayed. Once a macro is selected, you can use the buttons **in the middle of the dialog** (4) to copy items between templates or documents, delete, and rename macros.
